Explanation of the Articles in the Calendar.

Standard times* are given in all columns headed Toronto, Quebec, and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 13th.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The column, TRANSIT OF FIRST POINT OF ARIES, shows for every day the mean time* at which the FIRST POINT OF ARIES passes the meridian of longitude 4h. 46m. W. (71° 30′), and for any other meridian a correction of 0.655 secs. per degree will have to be applied, minus for longitudes west of the 71° 30′, and plus for east.

GREATEST ELONGATION OF THE POLE STAR.—This table gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.)

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 48′ 45″. The maximum error in the use of this Table will not exceed 5 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

*In the present Almanac the hours are numbered from 0 (midnight) to 23.

†Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuraoy for ordinary purposes by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

STAR TABLE.

From the times of the transit of the *First Point of Aries* may be derived, with the aid of the following table, the approximate times of culmination, rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the transit of the *First Point of Aries* for the given day in the calendar. If the result exoeeds 24 hours, *subtract* 23h. 56m.

To find the time of *rising* of a star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. The stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Example.—Find the time of *culmination* rising and setting of α Aquilæ.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the *tabular refraction*, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become *subtractive*. When great accuracy is required, 0·003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1908

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal and Current Survey, in the Department of Marine and Fisheries of the Dominion of Canada. They are based upon observations obtained by means of self-registering tide gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac office, London.

The Tide Tables for Halifax are based upon the analysis of a tidal record which was obtained during the years 1851, 1852, 1860 and 1861, together with the record from the present tide gauge during seven complete years; between October 1895 and June 1904. The Tide Tables for Quebec are based upon tidal record during eight complete years, between November 1893, and March 1902. The Tide Tables for Father Point are based upon tidal record during six complete years; from January 1897 to June, 1903. The Tide Tables for St. John, N.B., are based upon tidal record during eight complete years; between April 1894 and June 1903.

Charlottetown, Pictou, and St. Paul Island, with tidal differences for Northumberland Strait, the south-western side of the Gulf of St. Lawrence, the north shore of Prince Edward Island, and Cabot Strait.

St. Augustin Bar and Cap à la Roche, above Quebec.—These are at present the shallowest points at low water, until the deepening of the ship channel between Quebec and Montreal is completed throughout.

Victoria, B.C., Sand Heads, Strait of Georgia, and Port Simpson; with tidal differences for Esquimalt, Vancouver, New Westminster, Nanaimo, Baynes Sound, etc., and tables showing the time of Slack Water in the various Passes and Narrows.

INVESTIGATION OF CURRENTS.—The permanent and tidal sets of the current in the Gulf of St. Lawrence, Belle Isle Strait, the Bay of Fundy, and off the coast of Newfoundland, are also being investigated by the Tidal and Current Survey. The results obtained have been published as pamphlets, copies of which may be had on application to the Department of Marine and Fisheries, Ottawa.

The TIME used is Atlantic Standard, for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide, *add* 23·4 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Halifax, are given on page 41.

The TIME used is Atlantic Standard, for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 23·4 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Halifax, are given on page 41.

The TIME used is Eastern Standard, for the 75th Meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same Datum to which the soundings are referred, on the Admiralty Chart of Quebec Harbor.

LEVIS DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 7·7 feet to the height of High Water as above given. The TIDAL DIFFERENCES referred to Quebec, are given on page 41.

TIDE TABLES, ST. JOHN, N.B., 1908.

The TIME used is Atlantic Standard, for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides, as ascertained by the tide gauge observations themselves. (This level is approximately 1½ feet lower than the Datum to which the soundings on the Chart of St. John Harbor are referred, as nearly as this can now be ascertained.)

TIDAL DIFFERENCES for the Bay of Fundy, are given on page 41.

LEGAL WEIGHTS AND MEASURES IN CANADA.

The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon (of 277·27384 cubic inches), and the Imperial bushel. The Imperial gallon is equal to 4·54174 litres, while the wine gallon, used in the United States, is equal to 3·785 litres.

By Act 42nd Vic. (1879), Chap. 16 (amended by Chap. 30, Acts of 1898), it is provided: That in contracts for sale and delivery of any of the undermentioned articles, the bushel should be determined by weighing, unless a bushel measure be specially agreed upon, the weight equivalent to a bushel being as follows:—

Wheat, 60 lbs. Indian Corn, 56 lbs. Rye, 56 lbs. Pease, 60 lbs. Barley, 48 lbs. Malt, 36 lbs. Oats, 34 lbs. Beans, 60 lbs. Flax seed*, 56 lbs. Hemp, 44 lbs. Blue grass seed, 14 lbs. Lime‡, 80 lbs. Castor beans, 40 lbs. Potatoes, 60 lbs. Turnips, 60 lbs. Carrots, 60 lbs. Parsnips, 60 lbs. Beets, 60 lbs. Onions†, 50 lbs. Bituminous coal, 70 lbs. Clover seed, 60 lbs. Timothy, 48 lbs. Buckwheat, 48 lbs.

By the same Act the British hundredweight of 112 pounds and the ton of 2,240 pounds were abolished, and the hundredweight was declared to be 100 pounds, and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

Square, Surface, or Land Measure.

The square foot contains 144 square inches.
Yard = 9 feet = 1,296 inches.
Rod, pole, or perch = 30¼ yards = 272¼ feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 yards = 1,210 yards = 10,890 feet.

60 seconds″ = 1 minute.	90 degrees° = 1 quadrant.
60 minutes′ = 1 degree.	4 quadrants, or 360° = 1 circumference or circle.
30 degrees° = 1 sign.	

The earth rotates at a velocity of 15 degrees an hour (about 17.366 miles a minute at the equator); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of a circle × 3.1416 gives circumference.
Diameter squared × .7854 gives area of circle.
Diameter squared × 3.1416 gives surface of sphere.
Diameter cubed × .5236 gives solidity of sphere.
One degree of circumference × 57.3 gives radius.
Diameter of cylinder × 3.1416, and product by its length, gives the surface.
Diameter squared × .7854, and product by the length, gives solid contents.

A circular acre is 235.504 feet, a circular rood 117.752 feet in diameter. The circumference of the globe is about 24,855 miles, and the diameter about 7,900 miles.

The gallon is = 277¼ cubic inches = 0.16 cubic feet = 10 lbs. distilled water.

Cisterns: 1 cubic foot is equal to about 6¼ gallons, or 62.321 lbs. A cistern 4 feet by 2½ and 3 deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight.

A cubic foot of pure gold weighs 1,210 lbs., pure silver 655 lbs., cast iron 450 lbs., copper 550 lbs., lead 710 lbs., pure platinum 1,220 lbs., tin 456 lbs., aluminium 163 lbs.

METRICAL WEIGHTS AND MEASURES.

The French metrical system is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin :—

After agriculture, lumbering is the most important industry of the Dominion. For years forest products came first on the list of exports, and they still come second only to those of the farm, reaching a value for the fiscal year ending June, 1906, of thirty-eight million dollars. In the previous year it was estimated that the capital invested in "saw-mills and other industries having wood for their chief raw material" amounted to "nearly $120,000,000, paying wages of over $30,000,000, and having an annual output of $125,000,000." This was in addition to the enormous sums invested in timber limits, but the figures for the present year would far exceed those given above, for the lumber industry is a growing one, with domestic supplies of raw material behind it, which are almost incalculable.

Nearly thirty-eight per cent. of the whole area of the Dominion is forest land. Within historic times the great plains of the Northwest have never been well wooded, but, with the exception of little Prince Edward Island, the older provinces of Canada are rich in valuable trees. According to estimates given from time to time in the "Reports of the Canadian Forestry Association," Quebec has forest lands amounting to 209,741,463 acres, or 327,721 square miles; Nova Scotia has 1,516,631 acres of ungranted forest lands and about the same amount of granted lands now being used for lumbering purposes; and New Brunswick, in addition to large tracts of forest in private hands, has about 7,500,000 acres of Crown land, of which most is timbered, and about 6,000,000 acres is under license. Ontario has (approximately) 168,000 square miles of forest land, of which 20,063 square miles is under license. British Columbia has a forest area estimated at 285,000 square miles, densely covered with magnificent timber. In fact, this province is said to have "the greatest compact reserve of timber in the world." Lastly, extending across the north of the continent from Labrador to Alaska, a distance of 3,700 miles, is the vast sub-arctic forest, which covers an area about forty-four times the size of England.

In these enormous stretches of woodland, in which are more than 120 species of native trees, it may seem that the Dominion of Canada has a source of wealth that is practically inexhaustible. But experts in forestry are already sounding a note of warning. They say that if this country is to supply for any length of time the growing demands upon it for the products of the forest the utmost care and economy is necessary.

For instance, Dr. Fernow, late Director of the New York College of Forestry and now in charge of the Department of Forestry recently established at the University of Toronto, says:—"Natural supplies, however abundant, must give out unless we can and do reproduce them." Taking a somewhat lower estimate of the forest areas of Canada than that given above, he says:—"Statistics show that Canada has 800,000,000 acres of woodland, but of this vast acreage probably not fifty per cent. may be considered as forest land fit for timber production." The rest may be able, perhaps, "to satisfy domestic and pulpwood demands."

He points out that consumption of wood in spite of substitutes is enormously and constantly increasing. In fact he goes so far as to say "Our civilization is built on wood. From the cradle to the coffin in some shape or other it surrounds us as a convenience or a necessity . . . . We are rocked in wooden cradles, play with wooden toys, sit on

wooden chairs . . . . .are entertained by music from wooden instruments, enlightened by information printed on wooden paper with black ink made from wood." Over half our people live in wooden houses, more than two-thirds use wood as fuel, our thousands of miles of railroad tracks lie on millions of wooden ties, and on our coast and inland waters there still ply fleets of wooden ships. To give an idea of the extent of the consumption of wood in the United States and Canada (including exports), Dr. Fernow says that, if five persons are counted to a family, each family "uses on an average about 3,000 cubic feet or about 120,000 pounds of dry wood per year, the annual product of at least 60 acres of forest."

In the census returns of 1891 the total value of Canada's harvest of forest products was $80,000,000, "or about $16 per head," and, of the total cut, 70 per cent., or about 296 cubic feet per head, was used in Canada. For years four million pine sawlogs have been floated annually down the Ottawa river alone, and in 1901 the total for the Dominion was 33,538,000 standard logs, each having two hundred feet board measure, whilst the value of the total cut, according to the census reports, was $200,000,000.

The export of lumber began very early in the history of Canada. When the French first settled on the St. Lawrence, three hundred years ago, they reported that its forests would prove a rich source from which to supply the royal navy with masts and spars, and soon "stringent regulations were issued for the preservation of the standing oak." It is said that it was in 1667 that the first shipload of lumber was sent from Canada to Europe, and about the same date shipbuilding on a small scale was begun at Quebec.

When the country came under the British flag the governors received instructions to take measures for the preservation of timber likely to be of use in the royal navy, and during the latter part of the Revolutionary War masts and spars for the repair of the British vessels on the North American station were cut on the St. John.

At that period Great Britain drew her supplies of lumber mainly from northern Europe. Her vessels were the carriers for the Baltic trade and found in lumber "an unfailing and profitable return freight." But during the wars of Napoleon the supplies from the Baltic became insufficient and precarious, and the British importers then turned their eyes towards the vast forests of this country. In the year 1800 the North American colonies sent only 2,600 loads (about 52 tons) to the United Kingdom, but high duties on foreign timber and the free admission of colonial timber gave a great impetus to the trade of these provinces. At its highest point, in 1813, the duty on foreign timber was 64s. 11d. per load, with an additional impost of 3s. 2d. if carried under a foreign flag. In 1820, 308,000 loads of lumber were sent from the American colonies to the United Kingdom. In the following year a duty of 10s. per load was laid on colonial timber, but it still had the protection of 45s. per load. This was gradually reduced, and in 1846 the preferential duties favouring colonial lumber were abolished. The trade had been exceptionally prosperous in 1845; this had stimulated the production of lumber, and for a time the removal of the duties on foreign timber caused something like a panic amongst the lumber exporters of these provinces. Their fears of ruin happily proved groundless and exports to the United Kingdom continued to increase, reaching in 1850, 1,052,817 loads; in 1881, 1,301,301 loads; and in 1902, 1,733,291 loads. In 1906 the value of forest products sent from Canada to Great Britain was about $12,000,000, but this amount was greatly exceeded by the value of our export of wood and its products to the United States, which reached $23,000,000.

During the earlier part of the 19th century the United States had abundant supplies of lumber, but the pine forests of the northern States are no longer equal to the demand, and during the period of Confederation Canada has been rapidly increasing the amount of her exports of forest products to the United States. From 1868 to 1903 these exports reached a total value of $362,000,000, an average for the whole period of $10,000,000 per year. But the average per year for the last ten years was $13,900,000, an amount far distanced, as we have seen by the figures for 1905-6. On the other hand, Canada imports large quantities of

lumber from the United States. For instance, for the year ending June, 1891, the Dominion imported wood and its products to the value of $3,132,516, and for 1904 wood and manufactures of wood valued at $9,114,675. In 1905-6 Canada bought 55,000,000 feet of lumber and paid to the United States for logs and lumber $5,000,000.

Under the Elgin-Marcy or Reciprocity Treaty (in force from 1854 to 1866) lumber was on the free list, and in 1868 there was put on the Statute book of the Dominion an offer to admit timber, lumber, and other articles duty free whenever the United States should do the same. But that country committed itself to the policy of high protective duties and the Canadian lumber trade has suffered much from the artificial obstructions raised by hostile tariffs. In 1866 the American lumber duties were met by a Canadian export duty of one dollar per thousand on sawlogs. This was raised in 1886 to $2 per thousand, but was removed in 1890 when the American duties on lumber were reduced, and in August, 1894, raw forest products and planed lumber were placed by the Wilson Tariff Bill on the free list. The advantages to both countries of free trade in lumber seem so obvious that some people prophesied that it had come to stay. But in 1897 the Dingley Bill disappointed these bright hopes. This was more unfavourable to the Canadian lumber interests than the McKinley Tariff of 1890, and coming as it did at a time when half the Canadian imports from the United States were on the free list it roused great resentment in Canada as being "illiberal and gratuitously unfriendly." To the lumber schedule was added a clause imposing extra duties on lumber, pulpwood or paper coming from any country levying an export tax on sawlogs or pulpwood. In the same year the Dominion Parliament passed an act empowering the Governor-in-Council to impose export duties on logs in case of any country levying import duties on them, and the Province of Ontario empowered the Lieutenant-Governor to make regulations by Order-in-Council for the manufacture in Canada of pine and other timber cut on the Crown lands of the Province. Under this Act regulations have been made forbidding the export of pine, spruce, hemlock and hemlock bark cut on the Crown lands. The other provinces have not followed the example thus set by Ontario, though in the Province of Quebec "pulpwood cut on Crown lands for export pays dues of 65 cents per cord," as against 40 cents if it is manufactured into pulp in Canada.

Of late years American capitalists have shown an increasing tendency to invest in Canadian timber limits and to establish mills for the manufacture of lumber in this country, and there is, apparently, a growing desire amongst those interested that the Dominion Government should take action to prevent the exportation of raw forest products and to bring about their manufacture within our own borders.

One of the wood industries, the manufacture of pulpwood, has only been established in Canada within comparatively recent years, but it is making enormous strides. It made its first appearance in the census reports in 1881, and the figures below, taken from the Canadian Annual Review for 1903, give an idea of its development :—

	1881	1891	1901
No. Mills	3	24	30
No. Employees	68	1,025	4,550
Earnings of Employees	$15,720	$ 292,009	$1,587,597
Value of Output	63,300	1,057,810	6,176,300

Now there are 76 pulp factories, and in 1905-6 Canada exported to the United States woodpulp of the value of $2,649,106, and to Great Britain of $998,702. Besides supplying three-fourths of the wood for a thousand mills in the United States, Canada uses in her own factories a vast amount of pulpwood in making paper, car wheels, coffins, pails, roofing-materials, and a long list of other articles.

At one time the lumbermen set no great value on any other tree than pine, but the demand for pulpwood has given a new importance to the spruce. It is a comparatively quick growing tree, and if proper care is exercised in the management of the forests there seems no reason why Canada should not be able to supply for years to come all possible demands for pulpwood. The Superintendent of Forest Rangers in the Province of Quebec recently estimated that growing on one area of 30,000 square miles in the Lake St. John district there were a sufficient number of spruce trees to furnish 100,000,000 cords of pulpwood, and that 500,000 tons of pulp could be made annually for an indefinite period. The great northern forest consists largely of spruce trees, and of poplars, from which good pulpwood can also be made, while British Columbia has a variety of trees excellent for the purpose.

The construction of railways has been a great factor in increasing the value of our forests. In early days, it has been said, the trees were regarded as the natural enemies of the settler, who made war upon them and got them out of the way as quickly as possible; but now every kind of tree has its value, and there is a growing feeling against the reckless destruction of timber. In the past lumbering has been carried on by exceedingly wasteful methods. For instance the practice of squaring timber in the woods led to the loss of half the tree and vastly increased the danger of forest fires by filling the woods with debris that was ready to serve as kindling and spread any accidental or carelessly lighted fire far and wide amongst the standing timber. At Confederation, squared timber formed 42 per cent. of our whole export of wood to Great Britain, but by 1902 it formed only 7 per cent. of the whole, and there was a corresponding increase in the demand for sawn or manufactured wood—a change which is beneficial to the Canadian limit-holder and his employees and prevents much waste of timber.

It is said that more timber has been destroyed in Canada by fire than by the axe, but the nation is at last awaking to a realization of the value of its forest wealth. The Canadian Forestry Association (formed in March, 1900) is doing excellent work in disseminating information and rousing interest in questions connected with forestry, and the Dominion and Provincial governments are now making serious efforts to prevent bush fires and to preserve the timber.

All the provinces except British Columbia have appointed fire rangers, whose duty it is to patrol the woods, to enforce the laws with regard to "the setting of fires," and to take proper measures for extinguishing any which may be started. Ontario was the first province to put this system of fire ranging in operation (in 1885) and from the last report (1905-6) it appeared that there were 509 fire rangers on duty in the province, and that no serious fires had occurred in the territory under their supervision.

The Canadian people, owning the forests to a large extent, have a very direct interest in their preservation. The provinces of Quebec and Ontario each derive half their revenue from their forests. The amount received by the latter province for 1905-6 was $1,900,914, derived from bonuses, ground rent, timber dues, and transfer fees. In most of the provinces and on the Dominion Crown lands timber limits, or berths, are put up at auction and the bonuses are the sums offered for the right to cut timber over and above the ground rents and other fixed charges. The ground rents vary considerably in amount. In Quebec the ground rent is $3 per square mile, in Ontario it is the same, except in the case of limits sold recently, upon which it has been raised to $5, in New Brunswick it is $8, on Dominion lands east of Yale, B.C., it is $5, and west of Yale $32, and in British Columbia generally it is $140.

The management of the forests still leaves much to be desired, but of late a great step forward has been made by the setting apart of lands, unfit for agriculture, as permanent Forest Reserves, "to be owned in perpetuity by the Crown and operated for timber crops." Canada now has 20,000,000 acres of forest reserves, Quebec has 1,620,000 acres, and Ontario has 11,500,000 acres. The latter have been set apart under an Act passed in 1898.

DUMPING CLAUSE

6. In the case of articles exported to Canada of a class or kind made in Canada, if the export or actual selling price to an importer in Canada be less than the fair market value of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to Canada at the time of its exportation to Canada there shall, in addition to the duties

otherwise established, be levied, collected and paid on such article, on its importation into Canada, a special duty (or dumping duty) equal to the difference between the said selling price of the article for export and the said fair market value thereof for home consumption;

Provided that the said special duty shall not exceed fifteen per cent. ad valorem in any case;

(2) That the expression "export price" or "selling price" in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to Canada.

(3) That if at any time it appears to the satisfaction of the Governor-in Council, on a report from the Minister of Customs, that the payment of the special duty by this section provided for is being evaded by the shipment of goods on consignment without sale prior to such shipment, the Governor-in-Council may in any case or class of cases authorize such action as is deemed necessary to collect on such goods or any of them the same special duty as if the goods had been sold to an importer in Canada prior to their shipment to Canada.

(4) If the full amount of any special duty of customs is not paid on goods imported, the customs entry thereof shall be amended and the deficiency paid upon the demand of the Collector of Customs.

(5) The Minister of Customs may make such regulations as are deemed necessary for carrying out the provisions of this section and for the enforcement thereof.

(2) Whenever the Governor-in-Council deems it to be in the public interest to enquire into any conspiracy, combination, agreement or arrangement alleged to exist among manufacturers or dealers in any article of commerce to unduly promote the advantage of the manufacturers or dealers in such article at the expense of the consumers, the Governor-in-Council may commission or empower any judge of the Supreme Court, or Exchequer Court of Canada, or of any Superior Court or County Court in Canada, to enquire in a summary way into and report to the Governor-in-Council whether such conspiracy, combination, agreement or arrangement exists.

(3) The judge may compel the attendance of witnesses and examine them under oath and require the production of books and papers, and shall have such other necessary powers as are conferred upon him by the Governor-in-Council for the purpose of such enquiry.

(4) If the judge reports that such conspiracy, combination, agreement or arrangement exists in respect of such article, the Governor-in-Council may admit the article free of duty, or so reduce the duty thereon as to give to the public the benefit of reasonable competition in the article, if it appears to the Governor-in-Council that such disadvantage to the consumer is facilitated by the duties of Customs imposed on a like article.

THE KING'S CIVIL LIST.

Consequent upon the death of Her Majesty Queen Victoria, and the accession of His Majesty Edward VII., there was passed in the Parliamentary session of 1901 what is known as the Civil List Act, the Act by which is determined what charges shall be made on the consolidated fund for the maintenance of the King and his family.

Until George III. came to the throne in 1760, the income of the sovereign was derived chiefly from Crown lands, from a variety of landed property in England and Wales, Scotland and Ireland, in which the sovereign had a life-interest, and from which he received the rents. In the feudal ages these lands constituted a princely patrimony. In later times this Crown property was greatly reduced by lavish grants to royal favorites. At the Restoration the income from Crown lands was ascertained by a committee of the House of Commons to amount to £217,900 a year, in addition to £4,000 from the Forest of Dean. By the time Charles II. had been on the throne three years he had by his lavish bestowal

of the lands on favorites reduced the income to £100,000. William III., by his grants to favorites who had accompanied him from Holland, made further havoc with the Crown domains; so much so that at the accession of Queen Anne Parliament endeavored to save the remnant by an Act (1 Anne, c. 8) which prohibited alienation of Crown lands, and enacted stringent provisions in regard to the length of the term for which they might be leased and the rents reserved.

Since then, and especially since the Accession of Edward VII, the income from the Crown Lands has very greatly increased.

Queen Anne, George I. and George II. derived the larger part of their income from their life-interest in the Crown property, but when George III. came to the throne he surrendered his life-interest in the Crown lands. It was turned over to the nation in return for a fixed Civil List of £800,000, subsequently increased to £900,000. George IV., William IV. and Queen Victoria, on their accessions, surrendered their life-interest in the Crown lands in return for a Civil List. The same course was taken by Edward VII. when he came to the throne; and soon after Parliament assembled a committee of the House of Commons was appointed to recommend the new Civil List. It reported on the 4th of April, 1901, and its recommendations were embodied in an Act (1 Edward VII., c. 4), which was read a third time in the House of Commons on June 18th. By this Act the King's Civil List was fixed at a yearly sum of £470,000, assigned as follows:

CLASSES OF EXPENDITURE.	SUM APPROPRIATED.
I. Their Majesties' Privy Purse	£110,000
II. Salaries of His Majesty's household and retired allowances	125,800
III. Expenses of His Majesty's household	193,000
IV. Works	20,000
V. Royal bounty, alms and special services	13,200
VI. Unappropriated	8,000
Total	£470,000

In the event of Her Majesty Queen Alexandra surviving the King it is enacted that there shall be paid to the Queen during her life an annuity of £70,000.

Another clause provides that there shall be paid to the Prince of Wales "during the joint lives of his present Majesty and of his said Royal Highness, an annuity of £20,000"; that "there shall be paid to the Princess of Wales during the continuance of her marriage with the Prince of Wales, for her sole and separate use, but without any power of anticipation, an annuity of £10,000; and that in the event of the Princess surviving the Prince there shall be paid to her during her life an annuity of £30,000."

In respect to His Majesty's daughters, Princess Louise (Duchess of Fife), Princess Victoria and Princess Maud (Princess Charles of Denmark), it is enacted that as a provision for them there shall be an annual allowance of £18,000 during their joint lives, "to be reduced at the death of each of the said princesses by £6,000."

The Civil List of Her late Majesty, Queen Victoria, as fixed by the Act of 1837, was £385,000, assigned as follows:

Her Majesty's Privy Purse	£ 60,000
Salaries of Household	131,260
Expenses of Household	172,500
Royal Bounty, etc.	13,200
Unappropriated	8,040

At the death of the Queen, the allowances to Her Majesty, to the Prince and the Princess of Wales, and in respect to the Prince of Wales's children, aggregated £471,000, The details of these payments were:

Her Majesty's Civil List	£385,000
The Prince of Wales (26 Vict., c. 1)	40,000
The Princess of Wales (26 Vict., c. 1)	10,000
Annuity, Prince of Wales's children (52-3 Vict., c. 35)	36,000

Until the death of the Empress Frederick of Germany, on August 5th, 1901, annuities amounting to £72,000 were payable to other members of the Royal Family. These annuities were not affected by the death of the Queen, but with the death of the Empress an annuity of £8,000 came to an end.

The annuities to the Royal Family after the resettlement at the accession of Edward VII. stand thus:

His Majesty (Civil List)	£470,000
Prince of Wales	20,000
Princess of Wales	10,000
Princesses Louise, Victoria and Maud	18,000
Princess Christian of Schleswig-Holstein	6,000
Princess Louise, Duchess of Argyll	6,000
Duke of Connaught	25,000
Princess Beatrice (of Battenburg)	6,000
Duchess of Mecklinburg-Strelitz	3,000
Duke of Cambridge	12,000
Duchess of Albany	6,000
Total	£582,000

The revenues of the Duchies of Cornwall and Lancaster are outside the Civil List arrangement. Those of Cornwall, valued at £60,000 a year, are vested in the eldest son of the reigning sovereign, who becomes by birth the Duke of Cornwall, by virtue of a patent of Edward III. in 1337. The Duchy of Lancaster was the private patrimony of Henry Bolingbroke, son of John of Gaunt. It is separate from the other possessions of the Crown in order and government, but united to it in point of inheritance. It also brings in a revenue of £60,000 a year.

THE BRITISH ARMY IN 1907-8.

THE RE-ORGANIZATION OF THE MILITIA, VOLUNTEERS AND YEOMANRY, AND THE CREATION OF A NEW RESERVE.

The most important measure passed in the Parliamentary Session of 1907 was the Territorial and Reserve Forces Act. It completely re-organizes two branches of the auxiliary forces. These are the Volunteers and the Yeomanry, the forces which in time of war are called upon for home defence and from which in the case of some wars—notably in recent years the war in South Africa—the regular army is augmented.

The new measure, which was piloted through the House of Commons by Mr. Haldane, Secretary of War, is described as "an Act to provide for the re-organization of His Majesty's military forces, and for that purpose to authorize the establishment of county associations, and the raising and maintenance of a territorial force, and for amending the Acts relating to the Reserve forces." It received the Royal Assent on August 2nd, 1907; and will be known on the Statute books as 7 Edward VII. c. 9. The Act applies to England and Scotland and the Isle of Man; but not to Ireland where there has never been a volunteer force.

County Associations.

An Association for the purposes of the Act may be established in any county in the United Kingdom. The members are to be appointed and hold office in accordance with schemes made by the Army Council. Every such scheme must provide for the incorporation of the association by an appropriate name, with power to hold land for the purposes of this Act, without licence in mortmain. Also for:—

(*a*) Constituting the lieutenant of the county, or failing him such other person as the Army Council may think fit, president of the association; (*b*) For the appointment of such number of officers representative of all arms and branches of the Territorial Force raised under the Act within the county (not being less than one-half of the whole number of the association) as may be specified in the scheme; (*c*) For the appointment by the Army Council, where it appears desirable, of representatives of county and county borough councils and universities wholly or partly within the county; (*d*) For the appointment of such number of co-opted members as the scheme may prescribe, including, if thought desirable, representatives of the interests of employers and workmen; and (*e*) For dividing the county, where on account of its size or population it seems desirable to do so, into two or more parts, and for constituting sub-associations for the several parts.

When an association has been so constituted—under a scheme which must have been laid before both Houses of Parliament—it becomes the duty of the association "to make itself acquainted with, and conform to the plan of the Army Council for the organization of the Territorial Force within the county, and to ascertain the military resources and capabilities of the county, and to render advice and assistance to the Army Council, and to such officers as the Army Council may direct." An association is also to have, exercise, and discharge such powers and duties connected with the organization and administration of His Majesty's military forces as may for the time being be transferred or assigned to it by order of His Majesty, signified under the hand of a Secretary of State. No association, however, is to have any powers of command or training over any part of His Majesty's military forces. The powers and duties so transferred or assigned may include any powers conferred on or vested in His Majesty, and any powers or duties conferred or imposed on the Army Council or a Secretary of State by statute or otherwise, and in particular respecting the following matters:—

(*a*) The organisation of the units of the Territorial Force and their administration (including maintenance) at all times other than when they are called out for training or actual military service, or when embodied; (*b*) The recruiting for the Territorial Force, and defining the limits of recruiting areas; (*c*) The provision and maintenance of rifle ranges, buildings, magazines, and sites of camps for the Territorial Force; (*d*) Facilitating the provision of areas to be used for manœuvres; (*e*) Arranging with employers of labour as to holidays for training, and ascertaining the times of training best suited to the circumstances of civil life; (*f*) Establishing or assisting cadet battalions and corps and also rifle clubs, provided that no financial assistance out of money voted by Parliament shall be given by an association in respect of any person in a battalion or corps in a school in receipt of a parliamentary grant until such person has attained the age of sixteen; (*g*) The provision of horses for the peace requirements of the Territorial Force; (*h*) Providing accommodation for the safe custody of arms and equipment; (*i*) The supply of the requirements on mobilisation of the units of the Territorial Force within the county, in so far as those requirements are directed by the Army Council to be met locally, such requirements where practicable to be embodied in regulations which shall be issued to county associations from time to time, and on the first occasion not later than the first day of January one thousand nine hundred and nine; (*j*) The payment of separation and other allowances to the families of men of the Territorial Force when embodied or called out on actual military service; (*k*) The registration in conjunction with the military authorities of horses for any of His Majesty's Forces; and (*l*) The care of reservists and discharged soldiers.

The Army Council is to pay to an association, out of money voted by Parliament for army services, such sums as, in the opinion of the Army Council, are required to meet the necessary expenditure connected with the exercise and discharge by the association of its powers and duties.

The Territorial Force.

The Act makes it lawful for His Majesty to raise and maintain a force to be called the Territorial Force, consisting of such number of men as may, from time to time, be provided by Parliament. It also makes it lawful for His Majesty, by order signified under the hand of a Secretary of State, to make orders with respect to the government, discipline, pay and allowances of the Territorial Force.

These orders may provide for the formation of men of the Territorial Force into regiments, battalions, or other military bodies, and for the formation of such regiments, battalions, or other military bodies into corps, either alone or jointly with any other part of His Majesty's Forces, and for appointing, transferring, or attaching men of the Territorial Force to corps, and for posting, attaching, or otherwise dealing with such men within the corps; and may provide for the constitution of a permanent staff, including adjutants and staff sergeants who shall, except in special circumstances certified by the general officer commanding, be members of His Majesty's regular Forces; and may regulate the appointment, rank, duties, and numbers of the officers and non-commissioned officers of the Territorial Force. Such orders or regulations shall not, however, (*a*) affect or extend the term for which, or the area within which, a man of the Territorial Force is liable to serve; or (*b*) authorise a man of the Territorial Force when belonging to one corps to be transferred without his consent to another corps; or (*c*) when the corps of a man of the Territorial Force includes more than one unit, authorise him when not embodied to be posted, without his consent, to any unit other than that to which he was posted on enlistment; or (*d*) when the corps of a man of the Territorial Force includes any battalion or other body of the regular forces, authorise him to be posted without his consent to that battalion or body.

All orders and regulations made under this section must be laid before both Houses of Parliament as soon as may be after they are made.

Enlistment, Service, and Discharge.

The section of the Act regulating the enlistment, service, and discharge of men in the Territorial Force provides that every man enlisted shall be enlisted to serve for such a period as may be prescribed, not exceeding four years, reckoned from the date of his attestation; and that he may be re-engaged within twelve months before the end of his current term of service for such a period as may be prescribed, not exceeding four years from the end of that term.

Any man of the Territorial Force shall, except when a proclamation ordering the Army Reserve to be called out on permanent service is in force, be entitled to be discharged before the end of his current term of service on complying with the following conditions:—(i) Giving to his commanding officer three months' notice in writing, or such less notice as may be prescribed, of his desire to be discharged; and (ii) Paying for the use of the association for the county for which he was enlisted such sum as may be prescribed not exceeding five pounds; and (iii) Delivering up in good order, fair wear and tear only excepted, all arms, clothing and appointments, being public property, issued to him, or, in cases where for any good and sufficient cause the delivery of the property aforesaid is impossible, on paying the value thereof.

There is a provision, however, that it shall be lawful for the association for the county, or for any officer authorized by the association, in any case in which it appears that the reasons for which the discharge is claimed are of sufficient urgency or weight to dispense either wholly or in part with all or any of the above conditions.

A man may be discharged by his commanding officer for disobedience to orders by him while doing any military duty, or for neglect of duty, or for misconduct by him as a man of the Territorial Force, or for other sufficient cause, the existence and sufficienoy of such cause to be judged of by the commanding officer.

Where the time at which a man would otherwise be entitled to be discharged occurs while a proclamation ordering the Army Reserve to be called out on permanent service is in force, he may be required to prolong his service for such further period, not exceeding twelve months, as the competent military authority may order.

The Area of Service of the Territorial Force.

Any part of the Territorial Force shall be liable to serve in any part of the United Kingdom, but no part of the Territorial Force shall be carried or ordered to go out of the United Kingdom. It is provided, however, that it shall be lawful for His Majesty, if he thinks fit, to accept the offer of any part or men of the Territorial Force, signified through their commanding officer, to subject themselves to the liability:—(*a*) to serve in any place outside the United Kingdom; or (*b*) to be called out for actual military service for purposes of defence at such places in the United Kingdom as may be specified in their agreement, whether the Territorial Force is embodied or not; and, upon any such offer being accepted, they shall be liable, whenever required during the period to which the offer extends, to serve or be called out accordingly.

A man cannot be compelled to make such an offer, except by his own consent, and a commanding officer is not to certify any voluntary offer previously to his having explained to every person making the offer that the offer is to be purely voluntary on his part.

Duration of Training.

Every man of the Territorial Force shall by way of preliminary training during the first year of his original enlistment:—(*a*) If so provided by Order-in-Council be trained at such places within the United Kingdom, at such times, and for such periods, not exceeding in the whole the number of days specified by the Order-in Council, as may be prescribed, and may for that purpose be called out once or oftener; and (*b*) Whether such an Order-in-Council has been made or not, attend the number of drills and fulfil the other conditions prescribed for a recruit of his arm or branch of the service.

The requirement to attend training and drills, and to fulfil the forgoing conditions, is in addition to the requirement to attend training and drills and to fulfil conditions for the purpose of annual training.

Every man of the Territorial Force must by way of annual training:—(*a*) Be trained for not less than eight nor more than fifteen, or in the case of the mounted

branch eighteen, days in evsry year at such times and at suoh places in any part of ths United Kingdom as may be prescribed, and may for that purpose be callsd out oncs or oftener in every year; (*b*) Attend the number of drills and fulfil the other conditions relating to training prescribed for his arm or branch of the service.

His Majesty-in-Council may:—(*a*) Order that the period of annual training in any year of all or in any part of the Territorial Force be extended, but so that the whole period of annual training be not more than thirty days in any year; or (*b*) Order that the period of annual training in any year of all or any part of the Territorial Force be reduced to such time as to His Majesty may seem fit; or (*c*) Order that in any year the annual training of all or any part of the Territorial Force be dispensed with.

Embodiment and Penalties for Desertion.

Immediately upon and by virtue of ths issue of a proclamation ordering the Army Reserve to be called out on permanent service, it becomes lawful for His Majesty to order the Army Council, from time to time, to give and when given to revoke or vary such directions as may seem necessary or proper for embodying all or any part of the Territorial Force. In such an event every officer and man affected by the directions must attend at the place and time so fixed, and any man who without leave lawfully granted, or such sickness or other rsasonable excuse as may be allowed, fails to appear at the time and place appointed for assembling on embodiment, he shall bs guilty, according to the circumstances, of dessrtion, or of absenting himself without leave, and becomes, whether otherwise subject to military law or not, liable to be tried by court-martial, and convicted and punished accordingly, and may bs taken into military custody.

The sections of the Army Act with respect to deserters and desertion are to apply to men of the Territorial Force, and any person who, knowing any man of the Territorial Force to be a desertsr employs him or continues to employ him shall be deemed to have aided him in concealing himself. Moreover, any man of the Territorial Force who without leave lawfully granted, or such sickness or other reasonable excuse as may be allowed, fails to appear at the time and place appointed for preliminary training, or for annual training, or fails to attend the number of drills and fulfil the other conditions relating to preliminary or annual training prescribed for his arm or branch of the scrvice, becomes liable to forfeit to His Majesty a sum of money not exceeding fivs pounds recoverable on complaint to a court of summary jurisdiction.

Civil Riohts and Exemptions.

The acceptancs of a commission as an officer in the Territorial Force does not vacate the seat of any member returned to serve in Parliament. An officer or man of the Territorial Force is not liable to any penalty for his absence during ths time he is voting at any election of a member to serve in Parliament, or during ths time he is going to or returning from such voting; and an officer or man of the Territorial Force is not compelled to serve as a peace officer or parish officer. He is also exempt from serving on any jury, and a field officer of ths Territorial Army is not required to serve in the office of high sheriff.

Reserve Forces—The New Special Reservists.

The power of enlisting men into the first class of the army reserve undsr the Reserve Forces Act, 1882, is extended by this Territorial Forces Act of 1907 to ths enlistment of men who have not served in His Majesty's regular forces, and men so enlisted who have not served in the regular forces are to bs classed as special reservists. A special reservist may, in addition to being called out for annual training, be called out for a special course or special coursss of training at such place or places within the United Kingdom at such time or times and for such period or periods, not exceeding in the whols six months, as may bs presoribed, in like manner and subject to the like conditions as he may be called out for annual training, and may during any such course be attached to or trained with any body of His Majesty's forces.

A special reservist is, if he so agrees in writing, liable during the whole of his service in the army reserve, or during such part of that service as he so agrees, to be called out on permanent service without such proclamation or communication to Parliament as is mentioned in the Reserve Forces Act, 1882, and the calling out of men under this section does not involve the meeting of Parliament as required by that Act. Provided that (*a*) The number of men so liable shall not at any onc time exceed four thousand; and that (*b*) The power of calling out of men under this section shall not be exercised except when they are required for service outside the United Kingdom when warlike operations are in preparation or in progress; and (*c*) The number of men for the tims being called out under this section shall not be reokoned in the nuunber of the forces authorised by the Annual Army Act for the time being in force.

The changes in the organisation of the auxiliary forces contemplated by the Act will be made on March 31, 1908. Then Orders-in-Council will become operative which declars the old units—Volunteers and Yeomanry, to be passed to the nsw system and new units to be raised under the new system. Great Britain is already divided into six great military commands, each under a commander-in-chief. In each of the twelve grouped regimental districts into which the country is divided for the purposes of these commands, after March 31, 1908, there is to be a division of the Territorial Army complete, horse, foot, and artillery. Two of these regimental distriots which have large populations are to have two divisions, so that in all there are to be fourteen districts.

"Ths Government," said Mr. Haldane, Secretary of War, in a speech at Blair Athol, on September 16, 1907, "had prepared ths new machine. It was the people who would have to work it. There, as elsewhere, the Government meant to trust the people, and they believed that in trusting the people, in bringing the Army and the people closer together, in founding the Army in the very nation itself instead of leaving it as a caste apart, lay the solution of the problem which had baffled the nation so long—the problem of the best and most scisntific system of defence that could be devised for British shores."

It is expected that 300,000 men will be of the Territorial Forcs. The Field Force of Regulars available for service in any part of the world—that is the existing regular army organization—is to consist of 160,000 men. The average cost per head, all ranks, under the old system and the new scheme, based on figures published by the Army Council on April 13, 1907, is set out in the accompanying table. For the purposes of this calculation the Regular peace establishments exclusive of India, the normal numbers of the Army Reserve, and, for the new scheme, the special contingent and special service section of the Territorial Army have been included:—

	Present system.	New system.
Infantry of the Line	£53 16 0	£44 19 4
Foot Guards	46 16 6	46 16 6
Cavalry of the Line	78 0 6	72 0 0
Household Cavalry	110 2 0	110 2 0
Horss and Field Artillery	74 7 4	45 12 0
Garrison Artillery	71 12 0	67 12 6
Militia	21 9 3	.....
Yeomanry	19 17 0	.....
Volunteers	6 6 3	.....
Territorial Army (all arms)	.....	9 4 0

Details as to the militia, and also as to the volunteers and the yeomanry, the two forces that are to be henceforward of the Territorial Army, can be found in The Canadian Almanac for 1907, together with many details as to the regular army.

THE BRITISH NAVY IN 1907-1908.

Great Britain's Naval Policy.

It has long been the policy of British governments—Liberal as well as Conservative—that the strength of the Navy shall be equal to that of the combined fleets of the next two largest naval powers. In recent years ship-building for the British Navy has been somewhat in excess of this requirement; and the feature of 1904 in British naval history—as was recorded in these pages of the *Canadian Almanac* for 1905—was the abandonment of the old two-powers policy.

There was no formal declaration of the abandonment of the old policy and the adoption of a more progressive one; but something equivalent to a declaration of this kind was made by Earl Selborne, First Lord of the Admiralty, in the House of Lords, on August 9th, 1904, in answer to a speech made by Lord Brassey, who had urged that as the two-power standard had been reached there should be some retrenchment as regards new construction.

Earl Selborne reminded the House that the offer made by Lord Goschen, when First Lord of the Admiralty, to bring about a gradual reduction by agreement with foreign nations had never been withdrawn; and, referring to the two-power standard, pointed out that in regard to cruisers and torpedo boats the standard had never had a numerical application. No other Admiralty in the world had to consider that the safe-guarding of its shores was the first duty of the navy, and that on it depended the safety of the food of the people, or had to safeguard a vast and prepondering ocean commerce. Hence they could not compare the naval expenditure of this country with the naval expenditure of any two or more powers. The recent great expenditure on naval works was due to the fact that the question had been neglected for nearly two generations; and it had been necessary during the past ten years that Great Britain should overtake arrears.

This aspect of the British Navy was briefly discussed in the House of Commons at a much more recent date than Lord Selborne's speech on August 9th, 1904. On August 1st, 1906, Lieutenant Bellairs, R.N., Liberal Member for Lynn Regis, asked the Prime Minister whether the two-power standard was the one on which the new naval programme for the ensuing two years was framed; and whether it meant, as had hitherto been the case, a margin of safety over the two strongest European powers in the number of efficient battleships and a large superiority in cruisers. "The new ship-building programme," said Sir Henry Campbell Bannerman, "was framed after careful consideration of the programmes of the various foreign Powers, and the recent changes made in them. No new standard has been adopted, and it is considered equal to the requirements of the nation."

The Navy and Its Cost.

In 1906-7 the personnel of the Navy comprised 129,000 men and boys; and on the maintenance of this force, on new construction, and on repairs the total expenditure was £31,869,500. In this period, that is between April 1st, 1906, and March 31, 1907,—the undermentioned vessels were completed, and became available for service:—

4 Battleships (Africa, Britannia, Hibernia, Dreadnought).

3 Armoured cruisers (Achilles, Cochrane, Natal).

7 First-class Torpedo boats.

11 Submarines.

Floating Dock for Submarines.

For the year 1907-8, according to the estimates which were submitted to the House of Commons on February 28, 1907, the number of men in the naval service will be 128,000—one thousand less than in 1906-7—and the expenditures on the Navy will be £30,442,409—a reduction of £1,427,091 as compared with the expenditure in 1906-7. In the foregoing totals the cost of the civil service pertaining to the Navy is not included. When this cost is added it brings the total estimated expenditure on the Navy for 1907-8 to £31,789,860, as compared with £32,238,590 in 1906-7.

Details of the estimated expenditure in 1907-8 are as follows:—

Wages, etc	£6,869,700
Victualling and Clothing	1,996,400
Medical Establishments	268,700
Martial Law	14,200
Educational Services	172,500
Scientific Services	65,100
Royal Navy Reserves	418,300
Shipbuilding, etc.:—	
Personnel	2,549,900
Material	3,035,200
Contract Work	7,646,000
Naval Armaments	2,348,700
Works	2,758,400
Miscellaneous	401,000
Admiralty Office	364,600
Half pay, etc	837,900
Naval, etc., Pensions	1,302,000
Civil Pensions, etc	370,900
Total expenditure	£31,419,500

The naval year begins on the 1st of April, and at that date in 1907 the new tonnage actually under construction was:

5 Battleships.

7 Armoured Cruisers.

8 Ocean-going Torpedo Boat Destroyers.

17 First-class Torpedo Boats.

12 Submarines.

1 Royal Yacht Alexandra.

New Battleships of the Dreadnought Class.

For 1906-7 the amount expended on new tonnage was £9,235,000. The amount set aside for new construction in 1907-8 is £8,100,000. During the year work was begun on three battleships of the *Dreadnought* class—the third of these ships depending on the results of the Peace Conference at the Hague, but it was laid down as soon as it was seen that the conference had proved abortive in reducing armaments—one fast unarmoured cruiser; five ocean-going destroyers; twelve first-olass torpedo boats; and twelve submarine boats. The new battleships are to be of slightly larger displacement than the *Dreadnought*, which is now the largest war vessel afloat.* The *Dreadnought* went into commission on December 11, 1906—fourteen months after her keel was laid—and on one of trials she steamed from Gibraltar to Trinidad, a distance of 3,400 miles at an average rate that exceeded seventeen knots an hour.

*[The *Dreadnought* was described with some detail in *Canadian Almanac* for 1907.]

Twenty-six battleships were maintained in full commission during the whole of the year 1906-7. Fourteen were in commission during part of the year; and in addition to these ten battleships were in commission during the grand manœuvres. Fourteen armoured cruisers were in full commission during 1906-7; twelve were in commission part of the year; and during the manœuvres two other armoured cruisers were in service.

THE RECONSTITUTED FLEETS.

The re-distribution of the British fleet in 1904—a re-distribution that was determined upon in consequence of the object lesson afforded by the fighting at sea during the war between Russia and Japan—was desoribed at length in the *Canadian Almanac* for 1905. There was a further development of this policy at the end of the naval year 1906-7 and on March 5, 1907, the distribution and make-up of the five fleets stood as follows:—

There will be in the "narrow seas" in full commission, or with approximately three-fifth's nucleus crews, the following men-of-war, apart from small cruisers:

	Full commission	Nucleus crews.
Battleships	32	7
First-class cruisers	22	16
Destroyers	48	70
Torpedo-boats	20	30
Submarines	30	

Under the new arrangement the term "in reserve" is no longer applicable. All sea-going fighting vessels in the home ports, not belonging to other fleets or squadrons or appropriated for training purposes or local defence, belong to the Home Fleet, and will be able to complete to full crew at a few hours' notice. Certain vessels of older date were formerly desoribed as "in special reserve." These vessels are now kept fit for service and provided with crews sufficient to keep their machinery in good order and the ships ready for the duties required of them.

The Home Fleet in no way interferes with the rôle of the Channel and Atlantic Fleets, except in the event of a totally unforeseen outbreak of war during their absence from home waters. These two fleets—Channel and Atlantic—still occupy the principal fighting position.

AN ANSWER TO THE SOARE-MONGERS.

As has been the case for some years, the First Lord of the Admiralty is of the House of Lords. It was so when Lord Gosohen was First Lord, and again when the office

was held by Lord Selborne and Lord Cawdor. Lord Tweedmouth is now First Lord; and some of the most noteworthy recent statements regarding the Navy were made in the House of Lords on February 18, 1907, when the First Lord replied to the alarmist views which had been expressed by Lord Lovat. Lord Lovat was not confident that the British Navy as it was organized at the end of 1906 sufficiently guaranteed the British Isles from invasion; and he outspokenly stated that the nation which Britain had most to fear as regards invasion was Germany. For some weeks prior to these statements by Lord Lovat in the House of Lords, several of the London daily newspapers had been working up a scare about the Navy. Lord Tweedmouth, in reply, alluded to these newspaper scares, and expressed his surprise that Lord Lovat had become the mouthpiece in Parliament of these scare-mongers. To adopt the position that Britain was in any danger, he must, he said, assume a perfect series of hypotheses to be true. He must assume first that the sea was no longer a great defence to Britain. Then he must assume that foreign nations were anxious to attack the country, whereas at that moment Great Britain was in the most supreme agreement with all the great nations. There was not a shadow of difference between these nations and Britain —certainly no shade of difference which would be likely to lead to war. He would have to assume too, what was not the case, that if the Army was away the fleets would be away. Certainly the fleets were not away. Lord Tweedmouth could not admit Lord Lovat's statement that the fleets were an impossible distance away. Then Lord Lovat had quite forgotten that Britain had a very large force of destroyers and other vessels all along the coast which would be exceedingly awkward to an attacking fleet. Lord Tweedmouth did not agree with Lord Lovat that the ships in reserve were not equal in rapidity to those which would be brought against Great Britain. They were quite equal to those that the Germans could bring against them; and this would be still more the case when the whole fleet was organized as it would be in the course of the next six or eight weeks.* Nor must it be imagined that foreign nations had the monopoly of information and that the British Intelligence Department was badly served. Lord Lovat had not established his case; and Lord Tweedmouth believed that at that moment, and so far as he could see for a considerable time to come, the British might look their enemies in the face, if they had any, or at any rate look foreign nations in the face, and declare that Great Britain was only desirous to keep the peace of the world and that while she was determined to be always in a position to fight if called upon, so far as she could she would always use her forces in order to keep peace and not to make war.

Greater Britain and the Navy.

Towards the £32,238,000 which Great Britain expended on the Navy in 1906-7, Greater Britain contributed £440,396 :—

India	£99,511
Australian Commonwealth and New Zealand	252,885
Cape Colony	50,000
Natal	35,000
Newfoundland	3,000

THE NAVY YARDS IN CANADA.

The Dominion of Canada during the year 1906-7 took over the property formerly belonging to the Imperial Government at Halifax and Esquimault, in accordance with the agreement arrived at between the Home and the Dominion Government, when the naval squadrons were re-distributed in 1904. The more important conditions under which the Dominion Government entered on its new trust are:—

(1) The care and maintenance of the buildings, plant and machinery to be undertaken by the Dominion Government and to be regulated by similar instructions to those in force at the time of the closing of the yards. (2) The yards to be open to inspection by the Commanders-in-Chief of the North American, West Indies, and particular service squadrons when desired. (3) The yards to be available for the repair of his Majesty's ships at any time so far as their facilities admit. (4) The places where the navy coal has been hitherto stored to be kept free for such stocks as may be required from time to time for his Majesty's navy, access to the wharves to be available, and the use of all appliances for coaling his Majesty's ships to be permitted. (5) The Admiralty to have power to take over the full management and charge of the establishment in the event of war or any other emergency, of which the Admiralty shall be the sole judges. (6) The right for the Admiralty to revert into permanent occupation of the establishments whenever they consider that the interests of the navy render such course necessary, without incurring any liability towards the Dominion Government.

[Particulars as to pay and conditions of Service in the Navy will be found in the *Canadian Almanac* for 1907.]

GRAVING DOCKS IN CANADA.—There are four graving docks in Canada, three belonging to the Federal Government and one owned by a company. For 20 years from the completion the company has subsidies from the Imperial and Canadian Governments and from the city of Halifax, where it is located, amounting in all to about $30,000 (£6,180), of which the Canadian Government pays $10,000 a year. The following statement shows the dimensions of these graving docks:—

THE ROYAL MILITARY COLLEGE

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact, it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and, in addition, there is a complete staff of professors for the civil subjects which form such a large proportion of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the system.

In addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

Seven commissions in His Majesty's regular army are annually awarded as prizes to the cadets.

Three Commissions in the Permanent Force will be given annually, should vacancies exist, to the graduating class, viz. :—Every year one in the Infantry ; and each alternate year :

One in the Engineers and one in the Horse Artillery.

One in the Cavalry or Mounted Rifles and one in the Garrison Artillery.

Further, every three years a Commission in the Ordnance Corps will be given to the graduating class.

Three 2nd class clerkships, or appointments with equivalent pay, will be offered annually to the graduating class, such appointments to be in the following Departments, viz. :—Public Works, Railways and Canals, Inland Revenue, Agriculture and Interior.

The length of the course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from $750 to $800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Secretary of the Militia Council, Ottawa, Ont. ; or to the Commandant, Royal Military College, Kingston, Ont.

MILITIA AND DEFENCE OF CANADA.

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederatiou the British Government gradually withdrew all the Imperial troops from this country, and at present none remain.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Sovereign, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, especially in 1904, when a new Militia Act was passed (ch. 23, 4 Ed. VII.). By it the Militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Members of the King's Privy Council for Canada, Judges, Members of the Executive Councils of Provinces, Deputy Ministers of the Federal and Provincial Governments, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The Active Militia, or any portion thereof, may be ordered to drill or train for a period of not more than 30 days in each year.

The Militia is divided into Active and Reserve Forces. The Active force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service, for the Active Militia, is three years; for the Reserve Militia, such as is prescribed.

CANADIAN TEAMS TO WIMBLEDON AND BISLEY AND OFFICERS THEREOF FROM 1872 TO 1907.

Canada has always been represented by a team of its best shots at the annual Prize Meeting of the National Rifle Association of England. The first matches were held in 1872, at Wimbledon, but since 1890 they take place at Bisley. The most coveted of all prizes, the Queen's—now the King's prize (£250), was won twice by a Canadian: Pte. T. H. Hayhurst, 13th Regiment, Hamilton, Ont., in 1895, and Pte. J. S. Perry, 6th Regiment, D. C. O. R., Vancouver, B.C., in 1904. Many other important prizes have also been captured by our countrymen. The Kolopore Cup, contested for by the Mother Country and the Colonies was won eight times by the Canadians: in 1872, '75, '81, '84, '89, '96, 1905, and 1906. Eight men compose the team.

Canada sends to Bisley twenty representatives to take part in the various matches open to them, and these men are selected by competition held at Ottawa under the Dominion of Canada Rifle Association.

THE CANADIAN MILITARY RIFLE LEAGUE.

(HEADQUARTERS, OTTAWA, ONT.)

In 1893 the Canadian Rifle League was formed, with Headquarters at Toronto, the moving spirit and chief organizer being Lieut. W. R. Pringle, of the 10th Regiment, Royal Grenadiers. Rifle associations from all over the Dominion affiliated, and a series of simultaneous matches on given dates was inaugurated. In 1895, the Honorable the Minister of Militia and Defence granted free ammunition to the League teams, and with one exception this has been the rule since.

Four matches are held annually over King's ranges (200, 500 and 600 yards), and prizes given to the leading teams. Marksmen's certificates, signed by the Minister of Militia and Defence, and the Chief of the General Staff, are issued as follows:—

For an average of 94 points out of a possible 105, a first-class special certificate; for 90 points, a first-class certificate; for 80 points, a second-class certificate.

The competitions are divided into three series, as follows:—

The first (military) for teams of city corps of the Active Militia; the second (military for units other than city corps; the third, or civilian series, for teams of Civilian Rifle Associations. The entrance fee per team is $10. Fees for additional teams from the same organization, $5 each. Organizations bringing five new men to the Dominion of Canada Rifle Association Meeting get free entry for one team to the C.M.R. League competitions for the following year.

By Militia Order of June 10, 1903, the C.M.R. League was placed under the supervision of the Militia Department, Ottawa.

THE PALMA TROPHY INTERNATIONAL RIFLE-SHOOTING CONTEST.

This trophy of the United States was first put up to competition to the riflemen of the world, at Creedmore, Long Island, in September, 1876, and was incidental to the big Centennial Exhibition. It was then won by a team of the United States, against teams representing Ireland, Scotland, Australia and Canada respectively. As a souvenir of the occasion each member of the competing teams was presented with a handsome medal. In 1877 it was again won by the United States against Great Britain. It was only in 1901 that a Canadian team again competed for it, and this time won the trophy. On the 13th of Sept., 1902, immediately after the meeting of the Dominion of Canada Rifle Association, the competition took place at Ottawa, by teams from Great Britain, Canada and the United States, and the prize carried off by Great Britain. The ranges are 800, 900 and 1,000 yds , 15 shots at each range; teams composed of eight men each. The contest for this trophy was held at Bisley, England, on the 11th July, 1903, and won by the United States, but the cup was returned to the National Rifle Association of Great Britain, as barrels of rifles used by U.S. team had not been authenticated by latter Government. The next competition took place at Rockliffe Rifle Range, Ottawa, on 7th Sept., 1907, with the following result :

	United States.	Canada.	Australia.	Great Britain.
800 yds.....	590	566	570	551
900 yds.....	573	554	553	526
1000 yds.....	549	551	530	503
Totals....	1712	1671	1653	1580

The teams finished in the above order, and the United States representatives having brought back the prize, it will be contested for in the United States, during the summer of 1908.

POSTAL INFORMATION.

For List of Officials of Post Office Department, see page 298.

Letter Rates, &c.

Canada.—Letters posted in Canada, addressed to any place within the Dominion, 2 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by postage stamps.

Post Cards.—From any place in Canada to any place in Canada or to the United States or Mexico, 1 cent each. British and Foreign, 2 cents each.

Private Post Cards.—The face of a Private Post Card may be used for advertisements, illustrations, etc., provided that a clear space of at least ¼ inch is left along each of the four sides of the postage stamp, and a clear space 3¼ inches long and 1½ inches wide reserved for the address at the lower right hand corner of the card. Private Post Cards must not exceed a size of 6 inches in length by 3⅝ inches in width, nor be less than 4 inches in length by 2¾ inches in width. Cards of dimensions not conforming to these regulations are treated as insufficiently paid letters.

Pictorial Private Post Cards which have communications on address side.—Cards which have the back covered by a picture, and one-half of the front to the left of the address space reserved for written communications, are admitted as post cards.

Cards bearing the title "Post Card" or its equivalent are admitted to the mails at the rate for printed matter provided they conform to the general regulations respecting printed papers.

United Kingdom, Egypt, and British Possessions and Protectorates.—Postage on Letters, 2 cts. per oz.

Foreign Countries, except United States and Mexico.—Postage on Letters, 5 cents for a letter weighing one ounce or less. For letters weighing over one ounce 5 cts. for the first ounce and 3 cts. for each subsequent ounce or fraction of an ounce.

United States and Mexico—The rate on letters to the United States and Mexico is the same as in Canada, and at least one rate (2 cents) must be prepaid.

Double the deficient postage is charged on all unpaid or insufficiently paid letters for other countries.

Express or Special Delivery Letters.—Arrangements have been made for the delivery by special messenger daily, except Sunday, between 7 a.m. and 10 p.m., of letters bearing, in addition to the usual prepayment of two cents an ounce, a "Special Delivery" stamp of the value of 10 cts. or ordinary postage stamps of the value of 10 cts., and the words "Special Delivery" legibly written on the upper left hand corner of the envelope, addressed to the following cities in Canada: In Ontario—Toronto, Hamilton, London, Brantford, Kingston, Peterboro', Guelph, Stratford, Windsor and Ottawa; in Quebec—Montreal, Sherbrooke, St. Hyacinthe, Trois Rivières, and Quebec; in New Brunswick—St. John and Fredericton; in Nova Scotia—Halifax; in Manitoba—Winnipeg; in Alberta—Calgary and Edmonton; in British Columbia—Victoria and Vancouver. The "Special Delivery" stamp of the value of ten cents may be obtained at any Money Order post office.

Fully paid registered letters bearing "Special Delivery" stamps or ordinary stamps of the value of 10 cts., in addition to the postage and registration fee and the words "Special Delivery," come under the operations of this scheme of special delivery.

Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

Insurance of Registered Letters.

Registered letters posted at and addressed to any P.O. within the Dominion of Canada may be insured against loss for amounts not exceeding $25. The insurance fee as well as the ordinary postage and the registration fee must be prepaid in postage stamps on all insured registered letters. The insurance fees and the corresponding limits of compensation are as follows:—

Insurance Fee.	*Limit of Compensation.*

Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 10 lbs. is allowed); for foreign post, 4 lbs. Limit of size, domestic: 30 inches in length by 1 foot in width or depth; foreign: two feet in length, by one foot in width or depth.

Book packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

Books for the use of the blind are free of Canada postage, and correspondence passing between blind persons in raised characters is chargeable at the rate of 1 cent per 2 ozs.

The rate on Book Packets for delivery in Canada, Great Britain, the United States and all Postal Union Countries, is 1 cent per 2 ozs.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom and other countries by Book Post:—

Matter (other than newspapers and periodicals), wholly in print without reference to process, such as circulars, catalogues, calendars, hand-bills, books, pamphlets, printed forms, maps, prints, drawings, plans (without written specifications) engravings, lithographs, photographs (when not on glass or in cases containing glass) official or private post cards in quantities, sheet music (whether printed or written) instruction books in music, visiting cards, the manuscript of books or newspapers (whether hand-written or type-written) indented or perforated sheets of paper containing characters which can be read by the blind, botanical entomological and mineralogical specimens and the following partly-written and partly-printed matter:—militia and school returns, customs manifests, voters' lists, school or college examination papers, printers' proof sheets with corrections, exhibition entry tickets, municipal assessment rolls, Dominion and Provincial Government returns on official blanks, and all Dominion and Provincial Government documents, statute labor returns and municipal returns in general, etc., on which the rate of postage is 1 cent for each 2 ozs. or fraction thereof. To come within this class the material printed upon must be either paper, cardboard or parchment.

The following articles are subject to the rate of 2 cents for the first 4 ozs. or fraction thereof, and one cent for each additional 4 ozs.:—Seeds, cuttings (but not cut flowers), roots, bedding plants, scions or grafts.

Writing paper specially prepared for the use of the blind transmitted from a recognized Institution for the Blind in Canada to blind persons for their own use is allowed to pass at the rate of 1 cent for each 4 ozs. or fraction thereof; but before any Institution can post such paper at the above rate the Post Office Department at Ottawa must be satisfied as to its claim to be considered an Institution for the Blind.

No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage when posted for delivery within the Dominion of Canada.

Printed or written *requests for return* are recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, Mexico, the United Kingdom, the Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo, Ceylon, Cyprus, Falkland Islands, Figi, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, and Newfoundland, and to newsdealers in Canada, is fixed by law at ¼ cent per pound, provided the distance in Canada which any such newspapers or periodicals are required to be transmitted does not exceed 300 miles from the place of publication. If the distance in Canada exceeds 300 miles from the place of publication the postage rate is ½ cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not *less* frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, or in the United Kingdom, or the British Possessions mentioned above, or Mexico, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals sent to the United States either by publishers or other individuals are subject to the rate of 1 cent per 4 ounces.

Newspapers and periodicals weighing less than 1 oz. each may be posted singly, if prepaid by Postage Stamp ½ cent each.

The postage on *bona fide* specimen newspapers, and on papers and periodicals published less frequently than once a month, is 1 cent per lb.

British and foreign publications may be posted by newsdealers in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, the United Kingdom, Bahamas, Barbados, Bermuda, British Guiana, British Honduras, British North Borneo, Ceylon, Cyprus, Falkland Islands, Figi, Gambia, Gibraltar, Hong Kong, Jamaica, Leeward Islands, Malta, Mauritius, New Zealand, Newfoundland, Northern Nigeria, Sarawak, Seychelles, Sierra Leone, Southern Nigeria, Transvaal, Trinidad and Tobago, Turk's Islands, Zanzibar, or the United States or Mexico, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not having saleable value and not exceeding 3 lbs. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent for each 2 ozs. or fraction thereof under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided at least 1 cent is prepaid.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

UNDERWOOD TYPEWRITER
Phone Main 1126-1127 HEAD OFFICE. 7 & 9 ADELAIDE ST. EAST, TORONTO

Articles of saleable value even when intended to serve as samples are not admissible at sample rate.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

Useful Hints.

Register all valuable letters. Transmit money by Postal Notes or Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right-hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp.* When stamps are moistened the gum is apt to be removed.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. Every Parcel must be fully prepaid by postage stamps.

2. The dimensions of a Parcel addressed to the United Kingdom must not as a general rule exceed 30 inches in length or 1 foot in width or depth, nor must the combined length and girth of any parcel exceed 6 feet, a length of 3 feet 6 inches is allowed, however, in the case of parcels containing articles such as golf sticks, umbrellas, etc. The dimensions of a Parcel addressed to any country other than the United Kingdom must not exceed 2 feet in length by 1 foot in width or depth.

3. A Parcel must not contain a letter or any writing in the form of a letter, or any explosive, combustible, or dangerous articles.

4. All Parcels must be securely and substantially packed and closed.

5. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

6. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

7. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel; also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed.*

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fourth Class Matter.

Postage rate 1 cent per ounce or fraction thereof, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

Foreign Post—Commercial Papers.

"Commercial Papers" are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works, also open letters and post cards of ancient date which have already fulfilled their original purpose and pupils' exercises in original and corrected form but without any comment on the work. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll, when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

In the foregoing list the asterisk denotes members of the British House of Lords entitled to the designation of "Right Honourable." Barons Aylmer and de Blaquière are of the peerage of Ireland and not members of the House of Lords. The title of Baron de Longueuil existed prior to the Treaty of Paris (1763), and was duly recognized by Queen Victoria pursuant to that treaty. Sir Wilfrid Laurier, Sir Richard Cartwright and Sir S. H. Strong are styled Right Honourable as members of the English Privy Council. Members of the Canadian Privy Council are designated above by a † and have also the title of Honourable. Judges are distinguished by a ‡ and are also by courtesy or custom Honourable. The English practice is to give the title of Knight Bachelor to members of the Judicial bench, and the Attorney and Solicitor-Generals. *** Senator; hence, honourable.

For list of Companions of the Imperial Service order, see page 274.

The Order of Baronets, the lowest hereditary rank, was instituted in 1611; a Baronet is designated "Sir John Smith, Baronet"—usually written Bart. Taking precedence of Baronets are members of The Most Honourable Privy Council, who are addressed "Right Honourable."

The Order of the Bath, instituted in 1399, and revived in 1725, is divided into three classes—Knights Grand Cross, G.C.B.; Knights Commanders, K.C.B.; and Companions, C.B.

The Order of St. Michael and St. George, instituted in 1818, has also three classes—G.C.M.G., K.C.M.G., and C.M.G.

The Royal Victorian Order, instituted in 1896, has five classes—G.C.V.O., K.C.V.O., C.V.O. Members 4th and 5th classes—M.V.O. Col. S. B. Steele, C.B., M.V.O., is a member of the 4th class.

In all Orders of Knighthood the Knights Grand Cross and the Knights Commanders have the prefix "Sir" with the initials of their class following the name. Companions and Members bear no title, but have the letters C.B., C.M.G., C.V.O., M.V.O., as the case may be, attached to their names.

Knights Bachelors are gentlemen who have received the honour of Knighthood, and are entitled to the prefix "Sir" and to "Knt." after name.

It follows that members of any order of Knighthood may be entitled to several prefixes and affixes, as: Field Marshal The Rt. Hon. Earl Roberts of Kandahar, Pretoria, and Waterford, K.G., K.P., G.C.B., G.C.S.I., G.C.I.E., V.C.; The Rt. Hon. Sir Wilfrid Laurier, G.C.M.G.; The Hon. Sir C. Tupper Bart, G.C.M.G., C.B.

THE IMPERIAL SERVICE ORDER.

This civil order of distinction was instituted by King Edward VII, August 8, 1902, to more fully recognize the faithful and meritorious services rendered by members of the Civil Services of the various parts of the Empire. The following is a synopsis of the statutes relating thereto :—

(*a*) Name.—The Imperial Service Order.

(*b*) Consists of the Sovereign, the Prince of Wales, and such Companions as may be appointed.

(*c*) Only members of the administrative or clerical branches of Civil Services are eligible to Companionships.

(*d*) Number of Companions.—Limited to 425, of whom 250 for the home Civil Service and 175 for Civil Services of Colonies and Protectorates.

(*e*) Eligibility.—At least twenty-five years' meritorious service. In Colonies or Protectorates recognized as unhealthy, it is reduced to sixteen years. The periods are not compulsory in special cases of *eminently* meritorious service.

(*f*) Description of decoration.—A badge or medallion of gold and enamel, bearing on one side the Imperial and Royal Cypher, and on the reverse "For Faithful Service," both in dark blue enamel on a plaque or shield of Gold, surrounded by a wreath of laurel, surmounted by the Imperial Crown.

(*g*) Decoration to be worn on left breast suspended by a ribbon one inch wide.

(*h*) Names of those upon whom the decoration is conferred will be published in the *London Gazette*.

(*i*) Companions have the privilege of adding the letters "I.S.O." after their names.

(*j*) Members of this order are not deprived of eligibility to other orders of knighthood, and *vice versa*.

THE IMPERIAL SERVICE MEDAL.

It is also provided that members not eligible for companionships in the Imperial Service Order may, on retirement after service of twenty-five years or sixteen years, as above explained, receive the "Imperial Service Medal," which is of silver and of a design similar to that of the badge of the Companions of the Imperial Service Order.

$96,510,000.00

Is the estimated revenue that the farmers of Western Canada will receive for their 1907 crop of Wheat and Coarse Grains. Add the returns from Cattle, Hogs and Dairy Produce and the aggregate income of the Western Canada farmers will exceed

$100,000,000.00

To cover Western Canada with an advertising campaign, the employment of the "**Manitoba Daily Free Press**," and the "**Weekly Free Press**," and "**Prairie Farmer**," of Winnipeg, is indispensable. Each is a leader in its respective field, and they form a combination which cannot be equalled by any other medium or combination of mediums which may be used.

The Eastern Canadian Advertising Agencies, recognizing the value and importance to advertisers of the Western Canadian field, have made a close study of Western conditions, and advertisers contemplating a campaign in this territory can conveniently and with confidence apply to them for rates and information.

THE OFFICE OF PRIME MINISTER.

By Royal Warrant dated December 6th, 1905, an important change was made in the status of the Prime Minister. Until 1894 the office of Prime Minister, although it had existed for so long, had no official recognition. "Departmentally," Mr. Gladstone once wrote in reference to the Prime Minister, "he is no more than the first-named of five persons by whom jointly the powers of the Local Treasurerships are to be exercised. He is not their master, or otherwise than by mere priority their head, and he has no special function or prerogative under the formal constitution of the office. He has no official rank, except that of Privy Councillor. Eight members of the Cabinet, including five Secretaries of State and several other members of the Government, take official precedence of him. His rights and duties as head of the administration are nowhere recorded. He is almost, if not altogether, unknown to the statute law."

The first official recognition of the office came on March 3rd, 1894, when the "Court Circular" stated that Queen Victoria had offered to the Earl of Roseberry the "post of Prime Minister, vacated by the Right Hon. W. E. Gladstone, M.P." Even after this first official recognition the precedence of the Prime Minister was not determined; and there was no determination of his precedence until the Royal Warrant of December 6th, 1905, which announced "our Royal will and pleasure that in all times hereafter the Prime Minister of us, our heirs and successors, shall have precedence next after the Archbishop of York." Consequently the Prime Minister now has his place between the Archbishop of York and the Lord Chancellor of Ireland, and precedence over every member of his Government except the Lord Chancellor.

THE GOVERNMENT DEPARTMENTS.

THE TREASURY.

Chancellor of the Exchequer—Rt. Hon. Herbert Asquith.

First Lord of the Treasury—Rt. Hon. Sir H. Campbell-Bannermann.

Financial Secretary to the Treasury—Mr. W. Runciman.

Patronage Secretary to the Treasury—Mr. George Whiteley.

Junior Lords of the Treasury—Mr. J. A. Pease, Mr. Herbert Lewis, Capt. Cecil Norton.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the First Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Patronage Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

THE FOREIGN OFFICE.

Secretary of State for Foreign Affairs—Sir Edward Grey.
Under Secretary—Lord Fitzmaurice.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is usually of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Secretary of State, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

THE COLONIAL OFFICE.

Secretary of State for the Colonies—Earl of Elgin.
Under Secretary—Mr. Winston Churchill.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary at War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. India and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Jamaica. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies. Since August, 1907, the Colonial Office has been organized in 3 departments (1) Dominion Department, concerned exclusively with the self-governing colonies; (2) Crown Department concerned with Crown Colonies; and (3) Department having charge of legal and financial business. There was then appointed a Permanent Secretary for the Imperial Conference—Mr. H. W. Just being the first holder of the Office.

THE INDIA OFFICE.

Secretary of State for India—Rt. Hon. John Morley.
Under Secretary—Mr. C. E. Hobhouse.

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of His Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

THE HOME OFFICE.

Secretary of State for Home Affairs—Rt. Hon. Herbert Gladstone.
Under Secretary—Mr. Herbert Samuel.

The Home Department has the control of the London police force, and also the oversight of the police forces in the counties and municipal boroughs; and, generally speaking, the Department is responsible for the internal peace of the country. Prisons, convict establishments, criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining.

THE WAR OFFICE.

Secretary of State for War—Rt. Hon. R. B. Haldane, K.C.
Under Secretary—Earl of Portsmouth.
Financial Secretary to the War Office—Mr. T. R. Buchanan.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

THE ADMIRALTY.

First Lord of the Admiralty—Lord Tweedmouth.
Secretary to the Admiralty—Rt. Hon. Edmund Robertson, K.C.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are officers without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are directed by the Foreign Office and the Colonial Office.

THE BOARD OF EDUCATION.

President—Rt. Hon. Reginald McKenna.
Secretary—Mr. Thomas Lough.

The Education Department exercises supervision over the various departments of state-aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President was always of the House of Commons, and he was practically the Minister of Education. On the 1st of April, 1900, the Committee of Council for Education came to an end, and the powers it had exercised since 1839, enormously increased, however, since 1870, were transferred to a new State Department known as the Board of Education. The new Board was created under an Act of Parliament passed in the ordinary session of 1899. It consists of a President, the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. With the creation of this new Board there was for the first time a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council had been concerned chiefly with elementary education, except as regards the Science and Art Department. Now, however, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there was also created a Consultative Committee, which was to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are represented on the Consultative Committee. At the formation of the Balfour Government in 1902, and the retirement of Sir J. Gorst, Vice-President, the Marquis of Londonderry became the first President of the Board and Sir W. R. Anson the first Secretary.

THE LOCAL GOVERNMENT BOARD.

President of the Local Government Board—Rt. Hon. John Burns.
Parliamentary Secretary to the Local Government Board—Mr. T. J. Macnamara.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

THE BOARD OF TRADE.

President of the Board of Trade—Rt. Hon. D. Lloyd-George.
Parliamentary Secretary to the Board of Trade—Mr. H. E. Kearley.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines and electric lighting. The Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

THE POST OFFICE.

Postmaster-General—Rt. Hon. Sydney Buxton.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

THE BOARD OF AGRICULTURE.

President of the Board of Agriculture—Earl Carrington.

The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

OFFICE OF PUBLIC WORKS AND BUILDINGS.

First Commissioner of Works—Rt. Hon. Lewis Harcourt.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Palace at Westminster, the Law Courts, and the public offices at Whitehall.

DEPARTMENT OF THE LORD CHAMBERLAIN.

Lord Chamberlain—Viscount Althorp.
Comptroller of the Household—Sir Edward Strachey.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

IRISH AND SCOTCH DEPARTMENTS.

Chief Secretary for Ireland—Rt. Hon. Augustine Birrell.
Secretary for Scotland—Rt. Hon. John Sinclair.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

Officers of the House of Commons.

Rt. Hon. James William Lowther, elected Speaker in June, 1905 (salary £5,000), was unanimously re-elected on the opening of the new parliament. Mr. Alfred Emmott became Deputy Speaker and Chairman of Committees of Ways and Means (salary £2,500). Sir Courtenay Peregrine Ilbert remains Clerk of the House (salary £1,800); Henry David Erskine, Sergeant-at-Arms (salary £1,000); and the Venerable A. B. O. Wilberforce, Speaker's Chaplain, with a salary of £400.

MINISTERIAL PENSIONS.

Pensions are granted to ex-holders of Ministerial offices whose private fortunes are inadequate to their maintenance in their station in life. The number of these pensions, the three classes into which they are grouped according to offices held—£800, £1,500, £2,000 a year—and the conditions governing their award are determined by the Political Offices Pensions Act of 1869 (32 and 33 Victoria, c. 60)—an Act which was passed as an amendment to the Pensions Act of 1834. On the eve of the retirement of the Balfour Government—5th December, 1905—pensions of £2,000 were being paid to Lord Cross (since 1887), and to Lord George Hamilton (1892). These are first-class pensions. Second-class pensions of £1,500 a year were at that time being paid to Sir Michael Hicks-Beach, Mr. Henry Chaplin, Sir John Gorst, and Lord Balfour of Burleigh. As there can be only four pensioners in any of the three classes this class was full when the Balfour Administration was coming to an end; but Sir Michael Hicks-Beach was at this juncture made a peer. He became Lord St. Aldwyn and resigned his pension, which by warrant dated December 5th, was bestowed on Mr. Gerald Balfour, who in Mr. Arthur Balfour's Government had been President of the Local Government Board.

THE BRITISH PARLIAMENT.

The Balfour Government resigned on the 5th of December, 1905. Sir Henry Campbell-Bannerman, who had been leader of the Liberal Opposition in the House of Commons since February, 1899, formed a Liberal Administration, and the General Election took place in January, 1906. The British House of Commons, since the Franchise and Redistribution Acts of 1884-5, consists of 670 Members. Geographically, the seats held by these Members are distributed as follows:—

England		465
London	61

Qualifications for the Parliamentary franchise are various, but generally speaking the franchise is on a democratic basis; so much so, that it is possible for every man who is a householder, and who has been in occupation for a year previous to the enrolment of electors, to vote at a Parliamentary election. There is also a lodger franchise; but in this case the franchise is based upon the rental value of the rooms. It is also governed by the conditions of the tenancy, and but comparatively few men qualify for the lodger franchise, which, unlike the householder franchise, must be claimed every year. A recent decision in the law courts, Kent *v.* Tittal, 1905, has brought into prominence the occupier franchise, which is granted to men renting rooms over which they have complete control. These men are not lodgers, and they hold the franchise on the

same basis as the householder. Tens of thousands of working men voters were added to the electoral lists in 1906 as a result of this decision.

The electoral rolls are compiled by the local overseers of the poor, as most of the franchises are based on the payment of the poor rate. The rolls are then gone over in open court by the revising barristers, who hold their sessions every year, as a new list of voters is compiled each year. In England the new register comes into effect on December 1st.

Members of the House of Commons receive neither salaries nor indemnities. There are no mileage allowances or railway privileges, and Members do not enjoy the privilege of franking their correspondence through the mails.

Parliamentary candidates pay all the costs of elections, including the returning officer's fees and expenses. Deposits to cover these outlays must be made to the returning officer before a candidate can go to the poll. In the counties, the High Sheriffs, or their deputies, act as returning officers. In the self-contained boroughs—that is, in the boroughs which return Members, and are not part of a county division—the Mayor acts as returning officer.

Elections are not held all on one day. A general election usually extends over a month, and, if an elector is qualified in several constituencies, he can vote in each. Only freeholder voters can exercise the franchise in this way, as residence is not a necessary qualification for a freehold vote.

At the general election in January, 1906, the questions at issue were Fiscal Reform (Mr. Chamberlain's proposal to return to Protection); Chinese Labour on the Rand, which arose on the Balfour-Milner ordinance of 1904; and Elementary Education, or rather that aspect of this subject which affected the relationship of the Established Church and the Roman Catholic Church to public elementary schools which are maintained entirely by local and Imperial taxation.

On August 11th, 1905—that is, on the last day of the last session of the Parliament elected in September and October, 1900—the political constitution of the House of Commons stood as follows:—

Conservatives	312
Liberal Unionists	58
Liberals	217
Irish Nationalists	82
Speaker	1
Total	670
Unionist Majority	71

After the General Election of 1900, the Salisbury Administration had a majority over Liberals and Irish Nationalists of 134.

As the result of the General Election in January, 1906, the Campbell-Bannerman Government was continued in office, and began the Parliamentary session with a majority of 241 over the combined vote of the Conservatives, Liberal Unionists, and Irish Nationalist Members.

Mr. Speaker Lowther was of the Tory Party when he was elected to the Chair in 1905. As has now long been the usage at Westminster, he was re-elected at the opening of the new Parliament. Counting the Speaker as still of the Tory party, the political constitution of the House of Commons at the beginning of the session of 1906 was made up thus:—

Liberals	372
Labour	57
Conservatives	130
Liberal-Unionists	28
Irish Nationalists	83
Total	670

Not since the beginnings of modern Liberalism at the time of the American Revolution has the Liberal party been supported by so large a majority in the House of Commons. When Parliament was prorogued on August 28, 1907, as a result of bye-elections since the General Election of 1906, the numbers stood

Liberals	368
Labor	59
Conservatives	132
Liberal Unionists	28
Nationalists	83
Total	670

The Labour Members are divided into three groups:—(1) Fifteen miners' representatives, (2) thirteen Liberal Labour Members, and (3) thirty-one members of the Independent Labour party. Members of the first group (the miners' representatives) have been of the House of Commons since 1868, when the Right Honourable Thomas Burt and the late Mr. Alexander Macdonald (both of them miners' trade union officials) were returned.

The second group is composed of Liberals who are closely associated with the Labour movement; while the third group represents the Independent Labour Party, which was organized in 1901, and was represented in the last House of Commons by Mr. Keir Hardie, the leader of the movement, and three other members. The miners' members and the Liberal-Labour members sit on the Government Beuches, answer to the Government whips, and act generally with the Government.

Mr. Keir Hardie and his colleagues sit with the Nationalist Members on the Opposition side of the House of Commons. This group has its own whips, and, while usually voting with the Government, its members hold themselves at arm's length from it, and keep aloof from Liberal organizations in and out of Parliament. At bye-elections since Jan. 1906, this group has opposed Liberal candidates in working-class constituencies. The first loss sustained by the Liberals was at Cockermouth on Aug. 3, 1906, and was due to the nomination of a third candidate by the Labor Party. At bye-elections at Jarrow (July 4) and in the Colne Valley Division of Yorkshire (July 18) seats formerly held by Liberals were captured by Independent Labor men from official Liberal candidates. It was these gains that brought the number of Independent Labor Members up to 31. This new group advocates old age pensions, adult suffrage, and the establishment of an eight-hours' day by legislative enactment, and, broadly speaking, it is representative of the Socialist movement in England in its more immediately practical forms.

THE HOUSE OF LORDS.

Only in so far as concerns Scotland is the House of Lords affected by a general election. After a dissolution of Parliament, the Scotch Lords meet at Holyrood Palace, and in accordance with the terms of the Act of Union elect sixteen peers to represent them in the House of Lords. At the election on the 30th of January, 1906, at which the Duke of Montrose (Lord Clerk) presided, the following Peers were chosen:—

Earl of Mar.	Viscount Falkland.
Earl of Morton.	Baron Saltoun.
Earl of Mar and Kellie	Baron Sinclair.
Earl of Haddington.	Baron Torpichen.
Earl of Lauderdale.	Baron Balfour of Burleigh.
Earl of Leven and Melville.	Baron Belhaven and Stenton.
Earl of Carnwarth.	Baron Borthwick.
Earl of Northesk.	
Earl of Dundonald.	

All these Peers are Conservatives, and the only change was the substitution of Lord Borthwick for Lord Forbes, who was of the last Parliament, but declined re-election. The Irish Peers, who number twenty-eight, are elected for life. They are all Conservatives.

At the time the Balfour Government went out of office in December, 1905, there were 612 Peers. Of these, 537 were hereditary Peers of the United Kingdom, 5 were life Peers (the law lords), 26 were Archbishops and Bishops, 16 were Scotch representative Peers, and 28 were Irish representative Peers. On the formation of the Campbell-Bannerman Government, Mr. R. T. Reid went up to the House of Lords as Lord Chancellor, with the title of Baron Loreburn. In January and February, 1906, there were other creations of Peers; and on the 28th of June, at the anniversary of the King's Birthday, six new Peers were created. In all since the accession to office in 1905 of the Campbell-Bannerman Government, 20 new Peers have been created, all of whom are Liberals. Their creation brings up the number of Liberal Peers to 94.

BRITISH IMPORT DUTIES, 1906-7.

By Mr. Asquith's Budget of April 1907, Great Britain is left on the free trade basis on which she has stood since the Repeal of the Corn Laws in 1846. The only important changes made by the last Budget affected the Income Tax, import Duties being left untouched. The Income Tax remains at the rate of one Shilling in the pound but, beside the total exemption for incomes under £160 and abatements for incomes under £700, all persons with incomes not exceeding £2000 are entitled to have the tax levied at 9*d.* in the £1 on the earned portion of their incomes. BRITISH TAXATION AND INDEBTEDNESS.

The estimated receipts from taxation in the United Kingdom for the years 1906-7 are:—

Customs	£34,230,000
Excise	30,200,000
Death Duties	13,200,000
Stamps	8,150,000
Land Tax	700,000
House Duty	1,950,000
Property and Income Tax	31,500,000
Total Tax Revenue	119,930,000
Post Offices	17,500,000
Telegraphs	4,350,000
Crown Lands	480,000
Suez Canal, etc	1,100,000
Miscellaneous	1,500,000
Total Revenue	144,860,000
Net Increase	882,000

Customs and excise duties are levied on many articles of food and drink (*see* British Import Duties, page 260), although all these duties are imposed for revenue only. An outstanding feature in recent British Budgets is the falling off in revenue due to a declining consumption of alcoholic beverages. In 1905-6 revenue was collected on 11,800,000 gallons of wine as compared with 17,150,000 in 1899-1900; on 8,780,000 gallons of foreign and colonial spirits, as compared with 9,350,000 gallons in 1899-1900. on 32,490,000 gallons of British-made gin and whiskey as compared with 38,716,000 gallons in 1899-1900; and on 33,500,000 barrels of beer as compared with 36,500,000 barrels in 1899-1900. "These figures," said Mr. Asquith, the Chancellor of the Exchequer, in unfolding his Budget to the House of Commons on the 30th of April, 1906, "were made more striking by the fact that there had been an increase in the population of the country during that period of between two and three millions." While hoping that the main cause of the decreased consumption of alcohol was temperance, Mr. Asquith pointed out that the spending power of the community had been decreased by the increased taxation and the expenditure due to the South African war.

At the end of the financial year 1905-6 the National Debt stood at £789,990,187 as compared with £796,730,490 at the end of 1904-5. Since 1860 the lowest point at which the National Debt has stood was at £635,640,965 at the end of the financial year 1898-99. In 1860 it stood at £827,728,168.

The revenue and expenditures for 1905-6 and the estimated revenue and expenditures for 1906-7, and the disposition of the surplus for 1905-6 are as follows:—

1905-1906.

Revenue	£143,978,000
Expenditure	140,512,000
Balance to Sinking Fund, etc.	£ 3,466,000

1906-1907.

Estimated Revenue	£144,860,000
Estimated Expenditure	141,786,000
Surplus	£ 3,074,000

Disposed of—

By Reduction of Debt	£	500,000
Necessitous School Areas		135,000
Post Office Improvements		105,000
Abolition of Coal Tax		1,000,000
Reduction of Tea Duty		920,000
Balance for Contingencies		414,000
	£	3,074,000

PATENTS IN CANADA.

The Patent Office is a Branch of the Department of Agriculture, and the Minister of Agriculture for the time being is the Commissioner of Patents.

Any person who has invented any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement in any art, machine, manufacture or composition of matter, which was not known or used by any other person before his invention thereof, and which has not been in public use or sale with the consent or allowance of the inventor thereof for more than one year previously to his application for patent therefor in Canada, may, on a petition to that effect, presented to the Commissioner, and on compliance with the other requirements of the Act, obtain a patent granting to such person an exclusive property in such invention.

No patent shall issue for an invention which has an illicit object in view, or for any mere scientific principle or abstract theorem.

Any person who has invented any improvement on any patented invention, may obtain a patent for such improvement; but he shall not thereby obtain the right of vending or using the original invention, nor shall the patent for the original invention confer the right of vending or using the patented improvement.

The Patentee or his legal representatives must, within two years from the date of the patent or an authorized extension thereof, commence and continuously carry on in Canada the construction or manufacture of the invention patented in such manner that any person desiring to use it may obtain it, or cause it to be made for him at a reasonable price at some manufactory or establishment for making or constructing it in Canada. If after twelve months from the granting of the patent, or an authorized extension thereof, the Patentee or his legal representatives imports, or causes to be imported, into Canada the invention for which the patent is granted, such patent shall be void as to the interest of the person so importing.

The Commissioner, upon satisfactory cause being shown, may grant to the Patentee or his legal representatives an extension for a further term not exceeding one year beyond the twelve months during which he may import into Canada the invention; such application must be made within three months before the expiry of the said twelve months.

An Inventor obtaining a patent for his invention in a foreign country before obtaining a Canadian patent, may obtain the latter if same be applied for within one year from the date of the issue of the first foreign patent; and if within three months after the date of issue of a foreign patent the Inventor gives notice to the Commissioner of his intention to apply for a Canadian Patent for such invention, then no other person having commenced to manufacture the same device in Canada during such period of one year shall be entitled to continue the manufacture of the same after the Canadian patent has been obtained without the consent or allowance of the inventor.

Upon application for a patent, or within six months after issue of the patent, the Commissioner may order that, instead of the above provisions as to manufacture in Canada within two years, such patent shall be subject to the following conditions:—Any person, while the patent continues in force, may apply to the Commissioner for a license to make, construct, use and sell the patented invention, and if the Commissioner is satisfied that the reasonable requirements of the public have not been satisfied by reason of the neglect or refusal of the Patentee or his legal representatives to make, construct, use or sell the invention, or to grant licenses for so doing to others on reasonable terms, he may make an order under his hand and the seal of the Patent Office requiring the owner of the patent to grant a license to the person applying therefor upon such terms as to royalties, etc., as the Commissioner deems just, and if the Commissioner makes such an order, and the owner of the Patent refuses or neglects to comply therewith within three Calendar months after a copy of it is addressed to him or to his duly authorized agent, the patent and all rights and privileges thereby granted shall cease and determine.

Counsel Work undertaken in Patent Causes, and Patent Suits prosecuted before the Courts.

Validity and Infringements of Patents investigated. Assignments, &c. drawn. Searches made.

An application for a patent is made by a petition wherein the title or name of the invention is set forth, and in which the applicant declares that he is the inventor of the invention, as well as placing his domicile at some known and specified place in Canada, and such petition must be verified by affidavit or affirmation of the applicant that he believes he is the inventor of the said invention, and that the statements in the petition are true. Should the inventor be dead, such oath or affirmation may be made by his assignee or legal representative, and with the petition must be filed a specification (in duplicate) of the invention which shall correctly and fully describe the mode of operating same, the contrivances and things claimed as new, and for the use of which exclusive property and privilege is claimed, and shall bear the name of the place where, and date when, made, and shall be signed by the applicant and by two witnesses. In the case of a machine, the specification shall fully explain the principle and several modes in which it is intended to apply, and work out the same; and where the invention admits of illustration by means of drawings, the applicant shall also send in drawings in duplicate, showing clearly all parts of the invention. In all cases in which the invention admits of representation by model, the applicant, if required by the Commissioner, shall also furnish a model of convenient size; and when the invention is a composition of matter, the applicant shall also, on like request, furnish specimens of the ingredients and composition sufficient in quantity for the purpose of experiment.

In the case of conflicting applications for any patent, provision is made for submitting same to the arbitration of three skilled persons, two of whom shall be chosen by the applicants and the third by the Commissioner, and the decision or award in writing of such arbitrators, or of any two of them, shall be final.

A patent is granted for a term of eighteen years, but at the time of the application it is optional for the applicant to pay the fee for the term of six years, or twelve years only, as desired, and, unless further renewal payments are made, the patent expires on such dates respectively.

The patent may be assigned, but unless same duly registered in the Patent Office shall be null and void as against any subsequent assignee.

Every person who, without the consent in writing of the Patentee, makes, constructs, or puts into practice any invention for which a patent has been obtained, or who procures such invention from any person not authorized by the patentee, and who uses it, shall be liable to the patentee, or his legal representative, in damages.

Any action for infringement of the patent may be brought in any Court of record having jurisdiction to the amount of the damages claimed in the Province in which the infringement is alleged to have taken place. Proceedings may also be taken in the Exchequer Court, which has jurisdiction over the entire Dominion of Canada.

Every patentee shall stamp or engrave on each patented article sold or offered for sale by him the year of the date of the patent of such article, thus:—"Patented 1898," or as the case may be; or when, from the nature of the article, this cannot be done, then by affixing to it, or to every package where one or more of such articles is or are enclosed, a label marked with a like notice. For violation of this provision there is imposed a penalty not exceeding $100.00, and, in default of payment thereof, imprisonment for a term not exceeding two months.

Falsely marking an article as patented with the intent of counterfeiting or imitating the stamp, mark, or device of the patent of another person, or of deceiving the public, or offering for sale as patented any article not patented in Canada, is a misdemeanour, and for which there is a fine not exceeding $200.00, or imprisonment for a term not exceeding three months, or both.

Any intending applicant for a patent who has not yet perfected his invention, and is in fear of being despoiled of his idea, may file in the Patent Office a description of his invention so far, with or without plans, of his own will, and the Commissioner, on payment of the prescribed fee, shall cause the said document, which shall be called a caveat, to be preserved in secrecy, and, if application is made by any other person for a patent interfering in any way therewith, the Commissioner shall forthwith give notice, by mail, of such application to the person filing such caveat, who shall, within three months thereafter, if he wishes to avail himself of the caveat, file his petition, and take the other steps necessary on an application for a patent. The application for the patent must be made within one year from filing of caveat, otherwise the Commissioner is relieved from the obligation of giving notice.

The Government of Canada may, at any time, use any patented invention by paying to the Patentee such sum as the Commissioner reports to be a reasonable compensation for the use thereof.

All specifications, drawings, models, disclaimers, judgments, and other papers, except caveats, shall be open to the inspection of the public at the Patent Office, under such regulations as are adopted in that behalf.

The following fees are payable:—Full fee on patent for 18 years, $60.00; partial fee for 12 years, $40.00; partial fee for 6 years, $20.00; on filing caveat, $5.00; on registering assignment patent, $2.00; for copy of patent, with specification, $4.00.

The disbursements for filing an application in Great Britain are $25.00; France, $20.00; Germany, $5.00, and $7.50 before issuing patent; Australia, $20; Russia, $75.00; British India, $20.00. The German and French patents cover not only Germany and France but also their colonies. The Russian patent extends to all of the Russian possessions.

The disbursements for filing an application in the Australian States, namely, Queensland, Victoria, New South Wales, South Australia, Western Australia and Tasmania are $5.00 on filing of the application, $10.00 on allowance of same and $25.00 for preparation of the sealing of patent; New Zealand, $20.00; Mexico, $75.00; Natal, $50.00; Japan, $75.00; Jamaica, $150.00.

SOME FACTS ABOUT CANADA.

The earliest official records show that John and Sebastian Cabot, sailing under commission from King Henry VII of England, landed in 1497 on that part of the present Dominion of Canada known as Cape Breton in Nova Scotia.

Gaspar Cortereal discovered and named the Labrador coast in 1500.

Jacques Cartier, of St. Malo, France, acting under the authority and patronage of Francis I of France, discovered, in 1534, those portions of the Dominion of Canada now called New Brunswick, Prince Edward Island, and Quebec, and on his return to France presented the King with the first official record there is of the existence of these regions.

Captain Cook in 1778 gave the first authentic record of the discovery of Vancouver Island and the Pacific Ocean coast of the present Dominion.

Frobisher, Hudson, Parry, Franklin, Richardson, Back, Mackenzie, Simpson, Vancouver and others, between 1576 and 1847 explored and named the north and north-west coasts of the Dominion.

Colonization was practically begun in 1605-8. In 1605 Baron de Poutrincourt established Port Royal (now Annapolis Royal, in Nova Scotia), the first actual settlement by Europeans. In 1608 Champlain founded Quebec.

THE SUCCESSION DUTY ACT.

R.S.O. (1897), CHAP. 24 AND AMENDMENTS THERETO.

This Act applies to the Estates of all persons dying after 1st July, 1892.

The word "property" includes real and personal property of every description and every estate or interest therein capable of being devised or bequeathed by will or of passing on the death of the owner to his heirs or personal representatives.

The word "child" shall be deemed to include any lawful child of the deceased or any lineal descendant of such child or any person or persons adopted before the age of twelve years by the deceased as his child or children or any infant to whom the deceased for not less than ten years immediately prior to his death stood in the acknowledged relationship of a parent or any lineal descendant of such adopted child as aforesaid born in lawful wedlock.

The phrase "aggregate value" means the value of the property after the debts, encumbrances or other allowances (set out in the act) are deducted therefrom and shall include property situate outside of the Province as well as within.

"Dutiable value" means the value of the property after the debts, encumbrances or other allowances are deducted therefrom.

In determining the dutiable value of any property the value shall be taken as at the date of the death of the deceased, and allowance shall be made for reasonable funeral expenses and for his debts and encumbrances, but an allowance shall not be made (*a*) for debts incurred by the deceased or encumbrances created by a disposition made by the deceased unless such debts or encumbrances were incurred or created *bona fide* for full consideration in money or money's worth wholly for the deceased's own use and benefit and take effect out of his interest. (*b*) For any debt in respect whereof there is a right to reimbursement from any other estate or person. (*c*) More than once for the same debt or encumbrance charged upon different portions of the estate.

No duty shall be leviable:—

(1) On any estate the aggregate value of which does not exceed $10,000. (2) On property devised or bequeathed for religious, charitable or educational purposes to be carried on by a corporation or persons domiciled within the Province of Ontario. (3) On property passing under a will intestacy or otherwise to or for the use of a father, mother, husband, wife, child, daughter-in-law or son-in-law of the deceased, where the aggregate value of the property as defined by this Act passing to the persons mentioned does not exceed $50,000.

Save as aforesaid the following property shall be subject to a succession duty:—

(*a*) All property situate within this Province and any interest therein or income therefrom, whether the deceased person owning or entitled thereto was domiciled in Ontario at the time of his death or was domiciled elsewhere, and all moveable or personal property locally situate out of this Province and any interest therein where the owner was domiciled in this Province at the time of his death, whether such property passes by will or intestacy.

(*b*) All property situate as aforesaid or any interest therein or income therefrom, which shall be voluntarily transferred by deed, grant, bargain, sale or gift made in contemplation of the death of the grantor, bargainor, vendor or donor, or made or intended to take effect in possession or enjoyment after such death to any person in trust or otherwise or by reason whereof any person shall become beneficially entitled in possession or expectancy to any property or the income thereof.

(*c*) Any property taken as a *donatio mortis causa* made by any person dying, on or after the 7th April, 1896, or taken under a disposition made by any person so dying purporting to operate as an immediate gift, during life, whether by transfer, delivery, declaration of trust, or otherwise which shall not have been *bona fide* made twelve months before death of deceased.

(*d*) Any property which a person dying on or after the 7th day of April, 1896, having been absolutely entitled thereto has caused or may cause to be transferred to or vested in himself, and any other person jointly whether by disposition or otherwise so that the beneficial interest therein or in some part thereof passes or accrues by survivorship on his death to such other person, including also any purchase or investment effected by the person who was absolutely entitled to the property either by himself alone or in concert or by arrangement with any other person.

(*e*) Any property passing under any past or future settlement including any trust whether in writing or otherwise, and whether for valuable consideration or not made by any person dying on or after 7th April, 1896, by deed or other instrument not taking effect as a will whereby any interest in such property or the proceeds thereof for life or any other period is reserved to the settlor, or whereby the settlor may have reserved the right to exercise any power to restore to himself the absolute interest in such property.

Where the aggregate value of the deceased's property exceeds $50,000, and passes in manner aforesaid either in whole or in part to or for the benefit of the father, mother, husband, wife, child, son-in-law or daughter-in-law of the deceased, the same or so much thereof as so passes (as the case may be) shall be subject to a duty at the rate and on the scale as follows:—

(*a*) Where the said aggregate value exceeds $50,000 and does not exceed $75,000, 1 per cent.

(*b*) Exceeds $75,000 and does not exceed $100,000, 2 per cent.

(*c*) Exceeds $100,000 and does not exceed $150,000, 3 per cent.

(*e*) Exceeds $200,000, 5 per cent.

Provided where the value of any dutiable property exceeds $100,000 and the amount passing in manner aforesaid to any one person exceeds the amount hereinafter mentioned, a further duty shall be paid on the amount so passing in addition to the rates in the foregoing paragraph mentioned as follows:—

(*a*) Where the whole amount so passing to one person exceeds $100,000 and does not exceed $200,000, 1 per cent.
(*b*) Exceeds $200,000 and does not exceed $400,000, 1½ per cent.
(*c*) Exceeds $400,000 and does not exceed $600,000, 2 per cent.
(*d*) Exceeds $600,000 and does not exceed $800,000, 2½ per cent.
(*e*) Exceeds $800,000, 3 per cent.

Where the aggregate value of the property of the deceased exceeds $10,000, so much thereof as passes to or for the benefit of the grandfather or grandmother or any other lineal ancestor of the deceased, except the father and mother, or to any brother or sister of the deceased, or to any descendant of such brother or sister, or to a brother or sister of the father or mother of the deceased, or to any descendant of such last mentioned brother or sister shall be subject to a duty of $5 for every $100 of the value.

Provided that where the value of any dutiable property exceeds $50,000, and the amount passing in manner aforesaid to any one person mentioned in the next preceding subsection, except the father and mother, exceeds the amount hereinafter mentioned, a further duty shall be paid on the amount so passing in addition to the duty in the next preceding subsection mentioned as follows:—

(*a*) Where the whole amount so passing to one person exceeds $50,000 and does not exceed $100,000, 1 per cent.
(*b*) Exceeds $100,000 and does not exceed $150,000, 1½ per cent.

(*g*) Exceeds $350,000 and does not exceed $400,000, 4 per cent.
(*h*) Exceeds $400,000 and does not exceed $450,000, 4½ per cent.
(*i*) Exceeds $450,000, 5 per cent.

Where the aggregate value of the property of the deceased exceeds $10,000, and any part thereof passes to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described, or to or for the benefit of any stranger in blood to the deceased, save as hereinbefore provided for the same, shall be subject to a duty of $10 for every $100 of the value.

Any portion of an estate where the deceased at time of death is domiciled in Ontario, and which is brought into Ontario by executors or administrators to administer shall be liable to duty, but if any succession duty or tax has been paid thereon elsewhere than in Ontario, and such duty or tax so collected is greater than the duty payable in this Province no duty shall be payable thereon; but if the duty so paid elsewhere is less than the Ontario duty then the difference must be paid.

Where any duty or tax shall have been paid by the estate upon any moveable or personal property locally situate outside of Ontario or any interest therein, an allowance shall be made for any outside duty paid thereon; the difference, if any, between the outside and Ontario duty shall be likewise paid. Provided the above allowances and differences are only made with respect to any country, state or British Province or possession where a similar allowance is made for the duty or tax paid under this Act on property in Ontario passing on the death of any person domiciled in any such outside country.

Should an executor or administrator, in order to escape payment of Succession Duty, distribute any part of said estate without bringing the same into Ontario, such executor or administrator shall be liable, personally, to pay His Majesty the amount of duty as if such assets had been brought within Ontario, provided that this shall not apply to payments made to persons domiciled out of Ontario from assets situate without the Province.

No foreign executor or administrator shall assign or transfer any stocks or shares in Ontario standing in the name of a deceased person, or in trust for him, which are liable to pay Succession Duty until such duty is paid or security given therefore as provided, and any corporation allowing a transfer of any stocks or shares contrary to this provision shall be liable to pay the duty.

An executor or administrator applying for letters probate or administration to the estate of a deceased person shall, before the issue of such letters to him, make and file with the Surrogate Registrar a full and correct statement under oath, giving (*a*) full itemized inventory of all the property of the deceased and the market value thereof. (*b*) The several persons to whom the same will pass under the will or intestacy and the degree of relationship in which they stand to the deceased; and such executor or administrator shall, before the issue of such letters probate, deliver to the Surrogate Registrar a bond, in a penal sum equal to ten per cent. of the sworn value of such property liable to Succession Duty, executed by himself and two sureties to be approved of by the Registrar conditioned for the due payment of any duty to which the property may be found liable.

Should the Treasurer of Ontario be not satisfied with the value so sworn to or with the correctness of the Inventory, he shall direct the Sheriff of the County or City to make a valuation and appraise the said property, and provision is made for an appeal from such appraisement to the Surrogate Judge of the County within thirty days after making and filing such assessment. The duties imposed by the Act unless otherwise provided for shall be due and payable at the death of the deceased or within eighteen months thereafter. Should they not then be paid interest at 5 per cent. per annum from death of deceased shall be charged and collected, and same shall be a lien upon the property in respect to which they are payable until fully paid. Provision is made however as regards postponement of the duty payable on any future or contingent estates, income or interest, with the consent of the Provincial Treasurer in writing, until such estate, income or interest comes into possession. The Treasurer of the Province, on being satisfied that the full amount of Succession Duty has been or will be paid in respect of an estate or in part thereof shall, if required, give to the person accounting for the duty a certificate which shall discharge from any further claim the property shown by the certificate to form the estate.

An administrator, executor or trustee having in charge or trust any estate, legacy or property subject to duty shall deduct same therefrom or collect the duty thereon from the person entitled to such property, and shall not deliver any property subject to duty to any person until he has collected the duty thereon.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to His Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November, due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

Chief Justice of Ontario—Hon. Sir Charles Moss ($8,000). *Justices of Appeal*—Hon. F. Osler, Hon. J. T. Garrow, Hon. J. J. Maclaren, Hon. R. M. Meredith ($7,000 each). *Registrar*—J. A. McAndrew. *Assistant Registrar*—Charles S. Grant. *Usher and Librarian*—E. Oliver.

High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions and causes, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may and shall hear and determine all issues of law, and also (with or without a jury as provided by law) determine all issues of fact, and give judgment, and award execution thereon, as might on the 5th day of December, 1895, be done in His Majesty's Court of King's Bench, Common Bench or in matters which relate to the King's Revenue (including the condemnation of contraband or smuggled goods) as may be done by His Majesty's Court of Exchequer in England, and also the like jurisdiction as the Court of Chancery in England, on the 4th day of March, 1837, in cases of fraud, accident, trusts, executors, administrators,

co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possessed on the 10th day of June, 1857, to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

Law Circuits.—*Sittings for Hearing of Actions.*—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of His Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

Weekly Sittings.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Tuesdays and Fridays. Court business on Mondays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

Chambers.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

Long Vacation extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

Courts for the Trial of Controverted Elections.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the day next preceding the Christmas Vacation, and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

An appeal lies to a Divisional Court.

COUNTY COURT SITTINGS AND COURT OF GENERAL SESSIONS.—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county, for the trial of issues of fact, semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in December and March, and the second Tuesday in May and September, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction, and (except in the County of York) a sitting for the trial of issues without a jury shall be held in each county on the first Tuesday in April and October in each year. The County Judges are also Judges of the Surrogate Courts.

DIVISION COURTS are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200 and the original amount was ascertained by the signature of the defendant, and to $100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. FISHERY LAWS—*Continued.*

Synopsis of Fishery Laws.

Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of fire-arms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes.

The above enactments and close seasons are supplemented in special cases, under authority of the *Dominion Fisheries Act* (Chap. 95 R. S.), by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed: Department of Marine and Fisheries, Ottawa.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees may be appointed by the City Councils, or may be elected by general vote of qualified electors. Separate School Boards of Trustees have also the right to appoint trustees. The Principal of the High School or Collegiate Institute must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Fees are charged in many cases, and local rates must he raised. Every High School should have a Principal and at least two assistant teachers. Each school receives a fixed amount of $375, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have complied with certain conditions as to equipment, special teachers, etc., may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation to the Universities. There were 42 Collegiate Institutes and 100 High Schools in Ontario in 1906.

Public Schools.—Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its school affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality.

Educational Museum.—Connected with the Education Department is a Museum, containing specimens of school apparatus, etc., a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archæological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Curator of Museum. The Museum is open to the public from 9 a.m. to 5 p.m.

The Great-West Life Assurance Company was organized fifteen years ago in the belief that a Western Company, with all its investments in profitable Western securities, could do exceedingly well for the Policy-holders. This belief has been abundantly verified by the results accomplished. Examples are given on the opposite page.

RESULTS ACTUALLY ACCOMPLISHED

The Great-West Life Assurance Company submits as proof of the value of its Policies the following examples of contracts maturing this year (1907) under the Fifteen Year Deferred Dividend Plan:—

Fifteen Payment Life Policies

Policy No.	Amount	Total Premiums Paid	Total Cash paid the Assured
90	$2,000	$1,044.60	$1,482
159	3,000	1,814.85	2,625
179	2,000	1,020.30	1,444
208	1,000	478.80	688
242	2,000	1,255.80	1,800
251	5,000	2,007.75	2,860
267	5,000	3,444.75	4,910
586	1,000	589.20	851

Fifteen Year Endowment Policies

184	2,000	1,842.00	2,948
247	1,000	945.00	1,519
263	1,000	918.75	1,472
289	2,500	2,351.25	3,752.50

These notable results have been occasioned by the high rates of interest earned on investments, and the strict economy practised in administering the Company's affairs. An average of over 7% is earned on investments, in the best class of security, and this high interest-earning capacity naturally results in

LOW PREMIUM RATES

HIGH PROFITS TO POLICY-HOLDERS

The Law Society of Ontario.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under c. 172 (1897), the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Supreme Court for Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society, in which is provided accommodation for the Court of Appeal and the High Court of Justice for Ontario; with a valuable and extensive library.

LIFE ASSURANCE.

Life assurance in Canada may be said to be entirely conducted by companies incorporated by the Dominion Parliament. Their operations are governed by the provisions of their Charter and those of the General Insurance Act of Canada.

During 1906, 44 active companies were engaged in business, of which 24 were Canadian, 7 British, and 13 United States. The new assurances effected for the year amounted to $95,013,205, a decrease of $10,894,131 over those of 1905. The amount effected in each of the three classes of companies was as follows:

Canadian Companies, $62,450,253, or 66% of the whole.
British " 4,472,426, " 5% " "
United States " 28,090,526, " 29% " "

The aggregate assurance in force in Canada at the close of 1906 was $656,260,900, or $25,926,660 in excess of that existing at the close of 1905. The total was distributed thus:

Canadian Companies, $420,864,847, or 64% of the whole.
British " 45,655,951, " 7% " "
United States " 189,740,102, " 29% " "

That life assurance has developed and increased with the progress of the country, is abundantly evidenced by reviewing the figures contained in the following table, which sets forth the total assurance in force at the four periods, 1875, 1885, 1895 and 1906.

TOTAL ASSURANCE IN FORCE.

Year.	Canadian Companies.	United States Companies.	British Companies.	Total.
	$	$	$	$
1875	21,957,296	43,596,361	19,455,607	85,009,264
1885	74,591,139	49,440,735	25,930,272	149,962,146
1895	188,326,057	96,590,352	34,341,172	319,257,581
1906	420,864,847	189,740,102	45,655,951	656,260,900

It will be observed that in the period of 31 years the total life assurance in force has increased 672%. The Canadian Companies have increased their totals in the same time 1,817%; the United States Companies 335%; and the British Companies 135%.

The premium income of the Companies has kept pace with the increased volume of business, and in 1906 amounted to $22,364,456. The progress since 1875 has been uninterrupted, and is indicated below:

PREMIUM INCOME.

Year.	Canadian Companies.	United States Companies.	British Companies.	Total.
	$	$	$	$
1875	707,256	1,551,835	623,296	2,882,387
1885	2,092,986	1,723,012	803,980	4,619,978
1895	5,702,783	3,452,205	1,137,366	10,292,354
1906	14,093,056	6,687,539	1,583,861	22,364,456

In the 31 years the amount paid by Canadians for life assurance has increased by 676%. The Canadian Companies' premium income in that time has increased 1,893% the United States Companies 331%; and the British Companies 154%.

The death rate in 1906 among the active companies was slightly below the average of previous years, being 10.08 per 1,000.

The figures for the past 10 years are as follows:—

DEATH RATE.

Year.	Death-rate per 1000.	Year.	Death-rate per 1000.
1897	10.91	1902	10.30

1900	11.23	1905	10.33
1901	11.21	1906	10.08

The total amount paid on behalf of policyholders during 1906 for death claims, matured endowments, surrendered policies, and dividends, amounted to $13,040,857. The practical benefits of the system of life assurance in Canada is exhibited in the following table, setting forth the payments made by companies under their contracts in each of the last six years:

1901	8,993,125	1904	11,804,359

FOREIGN BUSINESS.

During recent years some of the Canadian Companies have extended their field of operation to places outside of Canada. This remark especially applies to the Canada Life, Confederation Life, Manufacturers Life, North American Life, and Sun Life.

SYSTEMS OF ASSURANCE.

On the following page will be found the premium rates of the principal companies for quinquennial ages, upon the ordinary systems of assurance, viz.: Whole Life; Whole Life with premiums limited to 10, 15, and 20 years; Endowment Assurance payable at the end of 10, 15 and 20 years, or at prior death with annual premiums limited to those periods. It will be observed that the premiums of the different companies vary very slightly. This is only to be expected in view of the fact that the same mortality table (the Institute of Actuaries Healthy Male Table) and the same rate of interest (3½%) are employed by practically all of the Canadian Companies.

BASIS OF RESERVE.

The Dominion Insurance Act stipulates that the valuation of policies of assurance issued prior to January 1st, 1900, shall be made on the Institute of Actuaries (Hm.) Table of Mortality, and a rate of interest not exceeding 4½%, and of policies issued after that date on the same Table of Mortality and 3½% interest. It further stipulates, in respect to policies issued prior to January 1st, 1900, that the rate of interest shall be modified to 4% in 1910, and 3½% in 1915. Several of the companies have already placed their reserves for all policies upon the stronger 4% Standard, while some have even gone so far as to anticipate the ultimate 3½% rate.

INVESTMENT POWERS.

Prior to 1899 the investment powers of Canadian Life Assurance Companies were determined by their respective Acts of Incorporation. At the 1899 Session of the Dominion Parliament the General Insurance Act was amended, enlarging and making general the investment powers of the companies. A detailed statement of the investments of these institutions will be found in the Yearly Report of the Superintendent of Insurance for the Dominion.

ANNUAL RETURNS.

The General Insurance Act requires each Company to make to Government a sworn return, embracing great detail, each year not later than the 1st day of March. These returns include statements of receipts, expenditures, assets, liabilities, policies issued and policies terminated. They are subsequently published in the report of the Superintendent of Insurance.

THE ROYAL COMMISSION ON LIFE INSURANCE

The insurance world has recently been greatly agitated over disclosures made with reference to the conduct of the business by certain large American Companies. A general feeling of distrust was engendered, which spread to Canada, and it was deemed advisable by the Dominion Government to appoint a Royal Commission to investigate the Canadian Companies. After a searching investigation the Commission submitted their report to the Government, accompanied by a draft bill embodying the various recommendations they saw fit to make. This report and draft bill will come up for consideration at the next meeting of the Houses of Parliament and the result of their deliberations will constitute the New Insurance Act.

INVESTMENTS.

The recommendations of the Commission are sweeping, and if adopted *in toto* will accomplish a practical revolution in life assurance. It is proposed to curtail still further the already limited classes of investment into which a life company may enter. In addition, returns must be made to the Government four times each year, setting forth in great detail full particulars with regard to all transactions in bonds, stocks, debentures, or other securities during the previous three months. It also provides that no director or other officer of any company shall have any personal or pecuniary interest whatever in any purchase, sale, or loan into which the company enters, except as regards a loan on officer's own policy; that transactions shall not take place with another company, of which any of the directors or officers of the assurance company are also directors or officers; that the under-writing and promotion of other companies shall be illegal.

COST OF NEW BUSINESS.

The draft bill provides that the total expenditure for new business, includiug

(1) Commission on first year's premiums.
(2) Compensation for other services in obtaining the business, not including salaries of Head Office or for agency supervision.
(3) Medical examinations and inspection.
(4) Advances to agents.

Must not be greater than the total loadings on first year premiums, together with an additional allowance composed of the difference between the net one year term premium and net ordinary life premium. Furthermore, all bonuses, prizes or awards to agents based on volume of business secured are forbidden, and all contracts with officers or salaried employees shall not be made for a period longer than three years.

POLICY CONTRACT.

The proposed bill provides further that the policy shall contain the whole contract between the company and the assured, and shall not be valid until first premium has been paid in full in cash. Every policy shall contain, in addition to tables of cash surrender, loan, paid-up and extended assurance values, an automatic non-forfeiture provision, by which in default of payment of premium the policy shall be automatically continued in force, provided three years' premiums have previously been paid. The practice of rebating is absolutely prohibited, and for each infraction of this section the manager and each director are to be made liable to a fine of $1,000, one half of which is to go to the informer. This proposal, however, is so impracticable that there is no possibility of its being adopted. Only four standard forms of policies are to be allowed to be used covering ordinary life, limited payment life, endowment and term policies. Other forms, however, may be used if approved by the Superintendent of Insurance.

SURPLUS.

It is provided that surplus shall be ascertained and distributed annually and not otherwise. In the case of policies written prior to the date at which the new law will go into effect on the deferred dividend system, the annual share of each is to be allotted and treated as a liabilily in the company's accounts. Instead of maintaining a net premium reserve on all policies, a company may, if it desires, maintain a lower reserve on all policies less than five years in force. For the first year the reserve must not be less than that for one year term assurance. Corresponding reductions are allowed up to end of fifth year, after which time the full net premium reserve must be held. The Company is forbidden to hold a higher reserve than the net premium reserve, or to use a rate of interest less than 3%. The reserve liability being ascertained, the total surplus must be distributed annually, except that the company is allowed to maintain a special contingency reserve varying from $10,000 for a small company, to 4% of the legal reserve in the case of a very large company.

The company and its agents are to be forbidden to furnish estimates as to the probable amount of surplus accruing at any future time. It is proposed, in addition, that the publication of actual dividends paid be made compulsory.

ELECTION OF OFFICERS.

In mutual companies and in stock companies giving policyholders the right to vote, special provisions are proposed in order that the voice of the policyholders may make itself felt more than at present. It is provided that policyholders may vote in person, by proxy or by mail, the proxies to be good for the occasion stipulated alone.

POLICY PRIVILEGES AND CONDITIONS

The policy contract of the progressive Canadian Life Assurance Company is a model in liberality and bears a marked contrast to those issued years ago. This increased liberality has come chiefly as a result of a healthy rivalry amongst the various institutions, thus stimulating each to offer the most attractive contract.

The modern policy is indisputable after one year has elapsed except in case of fraud. For the payment of premiums one month's grace is allowed. In the event of default in payment of premium, the assured has the privilege of applying for reinstatement at any time within thirteen months after due date of premium in default. Lapse, however, does not take place where the automatic non-forfeiture provision applies. Under this privilege, after three years' premiums have been paid, in default of payment of any premium, the policy will be kept in force automatically, without any action on part of assured, for as long a period as the Cash Surrender Value will provide, the assured having the right at any time to resume payment of premiums or not, according to the particular form of the non-forfeiture clause. After three years, generous surrender values are allowed which may be taken in cash, paid-up assurance or extended term assurance for full amount. These values are tabulated and set forth in the policy. Also the assured has the privilege of securing loans on the security of his contract for the amounts stipulated without in any way affecting the validity of his insurance. Also those policies issued on the with profit plans, participate in the surplus resulting from the operations of the company, thus combining the investment feature with the protective element, a combination that has been found highly advantageous to the assuring public.

These outstanding features of the modern policy have had a great effect in popularizing life assurance in recent years.

The Merwin Food Warmer

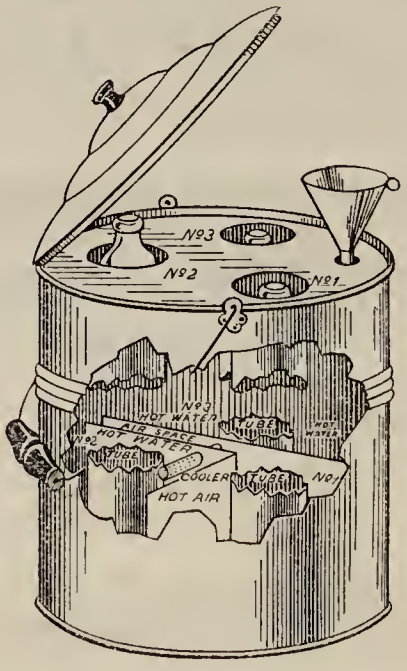
Is made with three separate compartments, having different degrees of temperature, and working upon scientific principles. The food in No. 1 is ready for use anywhere from half-an-hour to three hours after retiring, or say until 12 p.m.; No. 2 performs the same functions from 12 p.m. until 3 a.m., and No. 3 from 3 a.m. until 7 a.m.

Boiling water is poured into the warmer through the screw cap opening. Three bottles containing food are placed in tubes and do not come in direct contact with the water. They can be used for any liquid food.

If you use one you will not be obliged to get up in the night to heat food for the baby, and as there is no delay the baby will not become restless by having to wait for its food to heat after waking.

The warmer will save the price of itself in one year, as it does its own work, thus saving the cost of heating apparatus and material.

A supply of warm milk or food ready at any time day or night



Baby's health insured Temperature of food right at all times

THE MERWIN BABY FOOD WARMER is for the warming and keeping warm of milk and other liquid foods for infants and invalids.

It is the only practical appliance of its kind that has ever been placed on the market. It is simple; it has no mechanism to get out of order; it cannot explode; it is put into service by the simple pouring of hot water into a funnel.
